

'Click' Shell Scheme Construction Details

The Shell Scheme is built using the 'Click' Modular system consisting of aluminium uprights (which protrude 20mm off the panels) and aluminium cross rails running top and bottom of the panels. Exhibitors with specific queries should contact **Hirex**.

Panels

Panels are covered in fire retardent black material which accepts velcro fixings.

Under no circumstances must anything be nailed, screwed or glued to the shell scheme panels or metal frame work of the stand. All damage will be charged to the exhibitor at full replacement cost.

Graphics can be attached to stands direct with velcro (maximum width between uprights is 945mm). Exhibitors with larger graphics should contact **Hirex** for advice.

Nameboards

Exhibitors booking shell scheme sites should complete and return the nameboard form in the exhibitor manual. Should you fail to complete this form your name will be supplied by the organiser from your stand booking form. Nameboards cannot be altered on site.

Corner Sites

All corner sites will be open to the gangways with fascia to the perimeters overhead. Should you require additional walls please complete the additional standfitting order form and return it with payment to **Hirex** by the required deadline date.

Island Sites

Stands that are open to gangways on all sides. All island sites will have fascia to the perimeters with ceiling supports and vertical uprights within the stand where deemed necessary by **Hirex**. Exhibitors with large stands should check with **Hirex** for construction. Should you require additional walls please complete the additional standfitting order form and return it with payment to **Hirex** by the required deadline date.

Multiple Stands

All multiple stands will have dividing walls removed, however front uprights, fascia and ceiling structure will remain. The height under ceiling cross rails is 2335mm.

Space Only Sites

Space only sites are not permitted to attach anything to the adjoining shell scheme. Exhibitors taking space only sites backing onto, surrounded by or adjoining shell scheme sites should not assume that panels facing their stand will be finished. **Hirex** are not contracted to supply finished panels (ie. covered with material) to these sites. Space only exhibitors booking stands between shell scheme sites must deduct 55mm from overall measurements to fit within the allotted space (eg. a 3m x 2m space only site would in fact have floor dimensions of 2945mm x 1945mm).

Failure to note this will mean that your stand may not fit in the allotted site.

Hirex reserve the right to amend specifications without notice.

The logo for Hirex, featuring the word 'Hirex' in a bold, white, sans-serif font. The letter 'i' is positioned above the 'r'. The logo is set against a black background.
