PROCEEDINGS OF THE
FOURTH
BRITISH WEED CONTROL
CONFERENCE
organised by
the British Weed Control Council
and the
Pesticides Group of the Society of Chemical Industry
held at
the Hotel Metropole, Brighton
November 4–6, 1958

SOCIETY OF CHEMICAL INDUSTRY
14 BELGRAVE SQUARE, LONDON, SW1
1960
## CONTENTS

**Tuesday, 4th November, 1958**

### Session I

*Introductory Remarks:*

PROF. H. G. SANDERS (President, British Weed Control Council)  
*Chairman: DR. E. HOLMES*

A survey of international progress in chemical weed control  
*By E. K. WOODFORD*

*Discussion*

### Session II

**CONTROL OF WEEDS IN GRASSLAND AND FORAGE CROPS**  
*Chairman: PROF. J. MORRISON*

The effect of MCPA, MCPB and 2,4-DB on the productivity and botanical composition of permanent pasture  
*By R. S. L. JEATER*

An example of the relation between palatability of pastures and selective buttercup control  
*By MISS J. D. PHILLIPS and R. K. PFEIFFER*

The control of weeds in permanent pasture by MCPA and the subsequent effect on herbage productivity (an interim report)  
*By H. K. BAKER and S. A. EVANS*

*Discussion*

2,4-DB and MCPB in lucerne. I. Effect of 2,4-DB and MCPB on the development of the lucerne plant  
*By R. W. E. BALL and MARGERY SOUNDY*

2,4-DB and MCPB in lucerne. II. The use of 2,4-DB in the establishment of lucerne leys  
*By R. W. E. BALL and C. W. WILSON*

2,4-DB and MCPB in lucerne. III. The effects of MCPB and 2,4-DB on established lucerne  
*By R. W. E. BALL and C. W. WILSON*

2,4-DB and its butyl ester: residue levels in seedling lucerne  
*By H. A. GLASTONBURY, MARGARET D. STEVENSON and R. W. E. BALL*

*Discussion*

### Session III

**CONTROL OF WEEDS IN CEREALS**  
*Chairman: R. B. FERRO, ESQ.*

Selective weed control in cereals with CMPP and sodium monochloroacetate  
*By A. F. J. WHEELER*
<table>

**Session IV**

CONTROL OF WEEDS ON NON-AGRICULTURAL LAND AND IN WATER

*Chairman: DR. E. K. Woodford*

*Opening Remarks by S. A. Evans, Esq.*

The control of roadside vegetation (*manuscript not received*)

By F. L. Smith

Discussion

Advances in total weed control, with special emphasis on new methods of chemical evaluation

By J. R. Cox

Observation studies on total herbicides

By R. G. Hughes

Discussion

Control of aquatic weeds by copper sulphate

By R. J. Chancellor, A. V. Coombs and H. S. Foster

Toxicity of weedkillers, algicides and fungicides to trout

By J. S. Alabaster

**Session V**

*Chairman: PROF. H. G. Sanders*

Herbicides and the American farmer

By R. H. Beatty

Discussion

iv
Session VI

CONTROL OF WEEDS IN HORTICULTURAL CROPS

Chairman: A. D. HARRISON, ESQ.

Use of herbicides in bush fruit crops
By D. W. ROBINSON

Use of herbicides in apples, raspberries and strawberries
By D. W. ROBINSON

Preliminary trials of weedkillers in raspberry cane nurseries
By C. A. WOOD and J. P. SUTHERLAND

Tests of 2,4-DES, CIPC and dinoseb on Royal Sovereign strawberry
By R. I. C. HOLLOWAY

Discussion

Experiments with herbicides on beds of narcissus and tulip, 1955–58
By J. WOOD and S. J. HOWICK

Use of dinitro-compounds for pre-emergence weed control in peas
By O. G. GOODMAN

Annual weed control in established asparagus with monuron
By H. A. ROBERTS

Discussion, opened by G. MICHELMORE, ESQ.

Session VII

CONTROL OF WEEDS IN OTHER ARABLE CROPS

Chairman: R. G. HEDDLE, ESQ.

Herbicide tests on field beans
By J. G. ELLIOTT

Discussion

Weed control in various fodder and vegetable crops with sodium monochloroacetate
By R. H. HIRST and D. L. MARTIN

Control of weeds in farm kale by spraying with sulphuric acid, sodium monochloroacetate, potassium cyanate and gas liquor (N.A.A.S. experiments, 1956–57)
By W. Q. CONNOLD, R. E. ROGERS, D. G. BAGLOW, A. FINN, E. HARRIS and O. M. HOSEGOOD

Discussion

A guide to weed control in peas
By J. D. REYNOLDS

Discussion

Experiments in 1958 with propanil and endothal for controlling weeds in sugar beet
By A. F. MURANT

Control of wild oats in sugar beet and peas
By T. COLYN BREESE
### Session VIII

**SPECIAL WEED PROBLEMS**

*Chairman: Prof. R. L. Wain*

</table>
Activity and mode of action of triazine herbicides
By H. GYSIN and E. KNÜSLI

Use of herbicides in the surface re-seeding of old pasture:
I. The world position and some research in the United Kingdom
By J. G. ELLIOTT
II. An experiment with dalapon, aminotriazole and 2,4-D in conjunction with
oversowing of old pastures
By J. O. GREEN, D. D. KYDD and LEWIS JONES

Field experiences with dalapon in re-seeding difficult land
By J. F. ORMROD

Discussion
An assessment of sodium diphenylborinate as a selective herbicide
By G. E. BARNESLEY and J. YATES

Discussion
The herbicidal properties of 1:1′-ethylene-2:2′-dipyridylum dibromide
By J. STUBBS

Potato haulm destruction and pre-harvest weed control with chemicals
By A. J. BUTLER

Discussion
New herbicide for aquatic weed control
By J. VAN OVERBEEK

Aerial spraying techniques developed in New Zealand for helicopters
By E. C. S. LITTLE

Appendix I. Notes on meteorological conditions

Appendix II. List of delegates

Note added in final proof
In this volume, 2-chloro-4,6-bis-ethylamino-s-triazine has been termed 'simazin'. After most of the papers
had been passed for press, it was learned that the International Organisation for Standardisation (I.S.O.), the
British Standards Institution, and the British Weed Control Council have recently adopted the name 'simazine',
since 'Simazin' is now an American proprietary name.

Similarly, 'atrazin' and 'propazin' should have a final 'e'.
