

Crop Protection in Organic and Low Input Agriculture

Options for reducing agrochemical usage
BCPC Monograph No. 45

Proceedings of a Symposium organised by
The British Crop Protection Council, held at
Churchill College, Cambridge, UK
4th-6th September, 1990

BCPC Registered Office
49 Downing Street
Farnham, Surrey GU9 7PH, UK

PREFACE	viii
PROGRAMME COMMITTEE	ix
CHAIRMEN OF SESSIONS	ix
ABBREVIATIONS	x
1. ORGANIC AND LOW INPUT SYSTEMS IN THE UNITED KINGDOM	1
Crop protection in lower input systems of agriculture C. R. W. SPEDDING	3
Approaches to the development of low input farming systems V. W. L. JORDAN, J. A. HUTCHEON and D. A. PERKS	9
Organic agriculture in the United Kingdom L. WOODWARD and N. LAMPKIN	19
Alternative agriculture – a view from Brussels A. E. NYCHAS and D. PETER	31
2. WEED CONTROL	39
Population thresholds as an aid to weed control J. H. ORSON	41
Effect of seed rates and within crop cultivations in organic winter wheat ALISON M. SAMUEL and S. JANE GUEST	49
Intercropping of autumn-sown field beans and wheat: effects on weeds under organic farming conditions H. A. J. BULSON, R. W. SNAYDON and C. E. STOPEs	55
Patterns of weed emergence following soil cultivation and its implications for weed control in vegetable crops W. BOND and PHILIPPA J. BAKER	63
3. PEST CONTROL	69
Intercropping for pest control T. H. COAKER	71
Use of reduced rates of pesticides for aphid control: Economic and ecological aspects H. M. POEHLING	77
Environmental manipulation for the encouragement of natural enemies of pests S. D. WRATTEN and M. B. THOMAS	87
The role of host plant resistance to pests in organic and low input agriculture P. R. ELLIS	93
4. DISEASE CONTROL	103
Intra-crop diversification: Disease, yield and quality M. S. WOLFE	105
The use of composted materials for leaf disease suppression in field crops H. C. WELTZIEN	115
Disease control in cereals grown to conservation grade and UKROFS standards D. J. YARHAM, FAITH A. CULSHAW and CLAIRE E. SANSFORD	121

Control of diseases in field vegetables using resistant cultivars and their integration with biological and chemical methods R. E. BEALE and J. B. SWEET	131
5. SYSTEMS MANAGEMENT	137
Farming systems research for integrated arable and organic mixed systems in the Netherlands F. W. WIJNANDS	139
Cereal varieties for the organic and low input grower M. C. RICHARDS and V. HEPPEL	147
Practical constraints and opportunities for improving crop protection in organic vegetable production LORI PEACOCK	157
Rotational design and limits of organic systems – the stockless organic farm? SUSAN MILLINGTON, C. E. STOPES, L. WOODWARD and H. VOGHTMAN	163
Crop protection in organic cereals – a personal view D. URSELL	175
6. POSTERS	181
Session 2	
Weed studies in organic and conventional cereals ALISON M. SAMUEL and S. JANE GUEST	183
The use of surface mulches to clear grass pasture and control weeds in organic horticultural systems E. K. MARGARETA LENNARTSSON	187
The flame treatment of weed seedlings under controlled conditions S. PARISH	193
Crop competitiveness as an aid to weed control in cereals A. J. WHITING, M. C. RICHARDS and HELEN BROWN	197
Nitrogen uptake as a measure of weed competition in organic cereal crops R. J. UNWIN, HELEN M. BROWNING and A. SMITH	201
Sessions 3, 4 and 5	
Pest management in vegetable brassicas without insecticides R. G. MCKINLAY	205
The derivation of economic thresholds for insect crop pests and their role in crop protection decision-making in low input and organic farming systems W. E. PARKER	209
The use of nonwoven crop covers to prevent insect pests on field vegetables D. N. ANTILL and J. S. DAVIES	213
The effect of green manuring and mixed species cropping on take-all disease of wheat E. K. MARGARETA LENNARTSSON	219
The role of the United Kingdom cereal pathogen virulence survey in crop protection ROSEMARY A. BAYLES, M. H. CHANNEL and P. L. STIGWOOD	221
Establishment, diseases and yield of organically grown wheats S. JANE GUEST, ALISON M. SAMUEL and W. P. DAVIES	223

Responses of wheat to fungicide and low nitrogen inputs on shallow limestone soil S. P. SMITH and W. P. DAVIES	227
Elicitor – active yeast cell wall components as a novel crop protectant T. REGLINSKI, A. C. NEWTON and G. D. LYON	231
The use of composted materials to control plant diseases C. SCHUELLER, H. VOGHTMAN and C. E. STOPES	235
The effects of variety blends and seedrates on disease and weed incidence in wheat grown in organic systems P. A. DOVER and J. EAST	239
Growing cereals in a base of white clover E. D. WILLIAMS, M. J. HAYES and R. J. HAGGAR	251
Organic systems trials in the North of Scotland M. J. MACKAY and CHRISTINE A. WATSON	254
