

SYMPOSIUM PROCEEDINGS NO. 81

Plant Protection and Plant Health in Europe

Introduction and Spread of Invasive Species

Chaired by D V Alford & G F Backhaus

Organised jointly by BCPC and
the Deutsche Phytomedizinische Gesellschaft
and held at Humboldt University, Berlin, Germany
9 - 11 June 2005

 BCPC

Symposium Organising Committee	XIII

SESSION 1

OPENING CEREMONY	3
------------------------	---

SESSION 2

TRADE AS A PATHWAY FOR THE INTRODUCTION AND SPREAD OF ALIEN SPECIES

Ornamental horticultural trade as pathway for invasions. K Dehnen-Schmutz, J Touza, C Perrings and M Williamson	7
The spread of <i>Frankliniella occidentalis</i> through the UK protected horticulture sector – scales and processes. G D Jones, C A Perrings and A MacLeod.....	13
Quality management systems as a solution for the control of spread of alien species. U Meier.....	19
The current status of <i>Phytophthora ramorum</i> in Austria. A Plenk.....	25
Pest risk analysis in Europe – how can risks of invasive alien species be assessed and managed? G Schrader	29
Invasive pathogens – from Dutch elm disease to sudden oak death. J F Webber and C M Brasier	35

SESSION 3

RISK MANAGEMENT AND THE REGULATORY FRAMEWORK

Evaluation of brown rot (<i>Ralstonia solanacearum</i>) control strategies: development of an epidemiological model. A Breukers and D L Kettenis.....	43
The Global Invasive Species Database (GISD) and international information exchange: using global expertise to help in the fight against invasive alien species. M De Poorter and M Browne.....	49
Biodiversity conservation as part of plant protection: the opportunities and challenges of risk analysis. M De Poorter and M Clout	55
Ten years of experience with the invasive horse chestnut leaf miner (<i>Cameraria ohridella</i>) in Austria. C Lethmayer	61

Activities of the International Plant Protection Convention in regard to invasive alien species. R Lopian	67
Soil and biowaste as potential pathways for invasive alien species, and regulatory approaches to minimize the risks. M Pietsch	73
EPPO work on invasive alien species. M Suffert and I M Smith.....	79
The EU phytosanitary system and invasive alien species. J-G Unger	81

SESSION 4

MONITORING ALIEN SPECIES

Combining a disease model with a crop phenology model to assess and map pest risk: Karnal bunt disease (<i>Tilletia indica</i>) of wheat in Europe. R H A Baker, C E Sansford, B Gioli, F Miglietta, J R Porter and F Ewert	89
Biological traits of invasive insect species harmful to Moroccan agriculture. M Bounfour, F Jebbour and J Wadjinny	95
Ragweed, a new European biological air and soil pollutant: a call to the European Community for help to prevention of ragweed allergenic disease, a necessity of improving the quality of life of a wide range of people. C Déchamp and H Méon	101
Evolutionary genetics of invasive species: using molecules and morphological variation to trace the origin and dissemination of exotic pests. M J Navajas and D Navia	107
Monitoring and early warning systems for invasive alien species in the Plant Health sector in Europe. E Pfeilstetter	113
Non-native invertebrate plant pests established in Great Britain: an assessment of patterns and trends. R M Smith, R H A Baker, C P Malumphy, S Hockland, R P Hammon, J C Ostojá-Starzewski and D W Collins	119

SESSION 5

PARALLEL WORKSHOPS (I-III)

I – CLIMATE CHANGE AND ITS EFFECTS ON INVASIVE SPECIES

Occurrence of <i>Guignardia bidwellii</i> , the causal fungus of black rot on grapevine, in the vine-growing areas of Rhineland-Palatinate, Germany. M Harms, B Holz, C Hoffmann, H-P Lipps and W Silvanus	127
Introduction and possible spread of the planthopper <i>Metcalfa pruinosa</i> in Austria. A Kahrer.....	133

Introduction and distribution of the American eastern cherry fruit fly (<i>Rhagoletis cingulata</i>) in the Rhine Valley, Germany. I Lampe, H-J Krauthausen and F Burghause.....	135
Risks posed by the spread and dissemination of grapevine pathogens and their vectors. M Maixner	141

II – DIABROTICA: A CASE STUDY OF AN INVASIVE SPECIES

Western corn rootworm (<i>Diabrotica virgifera virgifera</i>), its potential spread and economic and ecological consequences in Germany. P Baufeld and S Enzian	149
Surveying and monitoring western corn rootworm (<i>Diabrotica virgifera virgifera</i>) in England & Wales. R J C Cannon, L Matthews, S Cheek, R H A Baker, A MacLeod, P W Bartlett and D Savage	155
Spread and population development of western corn rootworm (<i>Diabrotica virgifera virgifera</i>) in Austria. P C Cate.....	161
Costs and benefits of European Community (EC) measures against an invasive alien species: current and future impacts of <i>Diabrotica virgifera virgifera</i> in England & Wales. A MacLeod, R H A Baker and R J C Cannon	167
Initial movements of the introduced alien western corn rootworm (<i>Diabrotica virgifera virgifera</i>) for colonising suitable habitats. S Toepfer, N Levay and J Kiss.....	173

III – TRADE WITH BENEFICIALS AND USEFUL ORGANISMS: A RISK?

Reasons for and effects of changes in the parasitoid complex of the horse chestnut leaf miner (<i>Cameraria ohridella</i>). G Grabenweger, M Stolz, S Augustin, S Guichard, N Avtzis, S Bacher, P Kehrli, J Freise, W Heitland, S Girardoz, M Kenis, C Lethmayer, R Tomov and L Volter	179
Trade with beneficial mycorrhizal fungi in Europe: suitable quality management avoids distribution of unwanted organisms in mycorrhizal inoculum. C Grotkass, I Hutter and F Feldmann	185
Exotic beneficials in classical biological control of invasive alien weeds: friends or foes? M-K Seier	191
Are arbuscular mycorrhizal fungal species invasive – derived from our knowledge about their distribution in different ecosystems? E Sieverding and F Oehl	197
Joined spread of soil microbes and commercially re-established endangered plants in Europe. K Turnau, S Gawronski, S Zubek, T Anielska and A Jurkiewicz	203

Current status of the whitefly <i>Bemisia tabaci</i> as an introduced pest in Brazil. M R V Oliveira, P R Queiroz, K R Vilarinho and L H C Lima	269
The introduction and dispersal of whiteflies in the cassava production areas of Brazil. M R V Oliveira, K R Vilarinho, P R Querioz and L H C Lima	271
Kenyan cut flowers as a pathway for the introduction of plant pests to the UK. M G Palmieri, K Dehnen-Schmutz, J M Touza Montero and C Perrings	273
Alien insect and mite pests introduced to Italy in 60 years (1945-2004). G Pellizzari, L Dalla Montà and V Vacante	275
Gone with the wind: is it always true for invasive plants and, if not, why not? S Petrovskii and R P Blackshaw	277
Investigations on the occurrence of grape phylloxera (<i>Viteus vitifoliae</i>) in Austrian viticulture. H Reisenzein	279
Phenolic compounds in the leaves of alien and native <i>Impatiens</i> plants. B Šerá, N Vrchotová and J Tríska	281
Impact of the invasive weed <i>Ageratum conyzoides</i> in the Shivalik Ranges of the north-western Himalayas, India. H P Singh, D R Batish, R K Kohli, V Arora and S Kaur	283
Spread of horse chestnut scale (<i>Pulvinaria regalis</i>) in Germany. T Trierweiler and H Balder	285
Physiology of Benghal dayflower (<i>Commelina benghalensis</i>), a new invasive weed of the south-eastern USA. W K Vencill and P J Steptoe	287
Biologically active compounds as a possible cause of invasibility of knotweeds (<i>Reynoutria</i> spp.) from eastern Asia. N Vrchotová, B Šerá, J Tríska, E Dadáková and S Kužel	289
Host-range studies of the pathogen <i>Phytophthora ramorum</i> on ornamental plants. S Wagner, K Kaminski, E Idczak and S Werres	291
Evidence for the eastward spread of the aggressive oilseed rape pathogen <i>Leptosphaeria maculans</i> in Europe. J S West, B D L Fitt, M Jędryczka and Z Karolewski	293
Interactions between defoliation and herbicide application on the growth and recovery of Japanese knotweed (<i>Fallopia japonica</i>) in pot and field experiments. A Wilcox and T A Germany	295
