

SYMPOSIUM PROCEEDINGS NO. 78

Pesticide Behaviour in Soils and Water

Chaired by A Walker

Proceedings of a Symposium
organised by the British Crop Protection Council

Held at the Hilton Brighton Metropole Hotel, 13-15 November 2001

Preface	XI
Symposium Organising Committee	XII
Abbreviations	XIII

SESSION 1

INTRODUCTION

Role of modelling in environmental risk assessment M H Russell	3
Modelling pesticide environment fate: process understanding and knowledge gaps N J Jarvis	11
Towards a generalised linear model of groundwater pollution by pesticides F Worrall	19

SESSION 2

SORPTION AND MOBILITY (SMALL SCALE)

Effect of long-term sorption kinetics on leaching as calculated with the PEARL model for FOCUS scenarios J J T I Boesten and A M A van der Linden	27
The measurement of time-dependent desorption and its influence on modelling movement of a pesticide metabolite through soil to groundwater C R Leake, C M Burr, I A J Hardy, S L McMillan-Staff, <i>et al.</i>	33
Sorption kinetics of clomazone and pendimethalin in Tasmanian soils - problems for the licit opium poppy industry? J P Cumming, R B Doyle and P H Brown	39
Incorporation of soil-pH dependent behaviour in pesticide leaching assessment A M A van der Linden, A Tiktak and M Leistra	45
Characterisation of sorption for the modelling of pesticide fate S Beulke, C D Brown, I G Dubus and A Walker	51

SESSION 3

POSTER SESSION A

SORPTION AND MOBILITY

The influence of lipophilicity and formulation on the distribution of pesticides in sediment/water systems R H Bromilow, A A Evans and P H Nicholls.....	59
--	----

Formulations of the anionic herbicide imazaquin based on its sorption on crystal violet-montmorillonite complexes T Polubesova, S Nir, B Rubin, M Borisover and Z Gerstl.....	65
Effect of sewage-sludge amendment on simazine and 2,4-D behaviour in soil: laboratory and field studies L Cox, R Celis, M C Hermosin and J Cornejo.....	71
Porosity and surface fractal dimension of soils as affecting sorption, degradation and mobility of polar herbicides R Celis, L Cox, M C Hermosin and J Cornejo.....	77
Herbicide partitioning to hard surfaces C T Ramwell.....	83
Estimation of pesticide parameters from static and dynamic experiments by two independent modelling groups B Gottesbüren, K Platz, J R van de Veen, I G Dubus and S Beulke.....	89
Evaluation of lysimeter experiments in the Netherlands: case studies A A Cornelese, A M A van der Linden and A J Verschoor.....	95
Mobility of herbicides used for weed control in maize in lysimeter experiments L Guzzella, F Pozzoni, S Rullo and G Giuliano.....	101

DEGRADATION

A pilot study of the movement of permethrin into freshwater sediments I J Allan, W A House, N Warren, A Parker and J E Carter.....	107
Assessment of the environmental properties and effects of pesticide degradation products A B A Boxall and C J Sinclair.....	113
Estimation of standardized transformation rates of a pesticide and its four soil metabolites from field dissipation studies for use in environmental fate modelling J Dressel and C Beigel.....	119
Degradation of isoxaflutole and its metabolites in surface and subsoils under field conditions R L Jones, I A J Hardy, R E Lee and K M Hurst.....	127
Evidence for the enhanced degradation of metalaxyl in UK carrot soils S R Kenny, J G White and A Walker.....	133
Degradation of linuron in soils as influenced by different organic amendments and surfactants M S Rodríguez-Cruz, M J Sánchez-Martin and M Sanchez-Camazano.....	139
Degradation of pesticides in combination and their effect on soil microbial activity B K Singh, A Walker and D J Wright.....	145
Influence of fungal inoculant type and water potential on degradation of mixtures of simazine, dieldrin and trifluralin in soil-based media S Fragoeiro, A Elyassi and N Magan.....	151

The microbial degradation of nM-/μM concentrations of linuron estimated by a <i>Lemna minor</i> bioassay K Hulsen and M Höfte.....	157
--	-----

SESSION 4

SORPTION AND MOBILITY (LARGE SCALE)

Field-scale variability of herbicide transport B Lennartz, E Simic and G Destouni	165
Edge field leaching study of metalaxyl-M and its main metabolite E Capri, F Ferrari, Z Miao and M Trevisan.....	171
Infiltration of acetochlor metabolites in two contrasted soils N Baran, C Mouvet, T Dagnac and R Jeannot	177
Sorption properties of isoproturon and diflufenican on ditch bed sediments and organic matter rich materials from ditches, grassed strip and forest soils C Margoum, V Gouy, I Madrigal, P Benoit, <i>et al.</i>	183
Pesticide penetration and groundwater recharge on a chalk hill slope in southern England A H Haria, A C Johnson and M G Hodnett.....	189

SESSION 5

DEGRADATION

Improving the exploitation of micro-organisms in environmental clean-up I P Thompson, A C Singer and M J Bailey	197
Sorption and degradation of glyphosate and dichlobenil in fractured clay J Aamand and O S Jacobsen	205
The use of enantiomeric ratios to assess the fate of mecoprop in groundwater G M Williams, I Harrison, D J Noy, O Crowley and R Kalin	211
Biobeds: safe disposal of pesticide waste and washings P Fogg.....	217

SESSION 6

QUANTITATIVE ASPECTS

Examining the spatial variation of environmental properties using geostatistics Z L Frogbrook	225
Using geostatistics to evaluate spatial variation in pesticide/soil interactions O R Price, A Walker, M Wood and M A Oliver.....	233
Sources of uncertainty in pesticide fate modelling I G Dubus, C D Brown and S Beulke	239
Pesticide leaching potential in the Trasimeno Lake area. Assessment of uncertainty associated with the simulation process M Trevisan, R Calandra, C Vischetti, A Esposito and L Padovani.....	245

FOCUS surface water scenarios: influence of soil degradation and sorption parameters on simulated losses of pesticides via drainflow and runoff in step 1, 2 and 3 scenarios R Allen <i>et al.</i>	251
---	-----

SESSION 7
POSTER SESSION B

SORPTION AND MOBILITY

Volatilisation: an important route reducing pesticide leaching and persistence in soil E Capri, M Nicelli, M Trevisan and M Larsson	259
--	-----

QUANTITATIVE ASPECTS

A spatially distributed assessment for pesticide exposure in surface waters via drainflow C D Brown, I G Dubus and C Gustin.....	265
Modelling pesticide behaviour at the catchment-scale – the TERRACE project N Kannan, S White, S P Anderton, F Worrall and J M Hollis.....	271
Cost-effective risk assessment of pesticide leaching at field scales: quality versus quantity of information D C Lambkin, M Wood and L P Simmonds.....	277
Metamodeling to assess pesticide leaching on a wide scale L Padovani, E Capri and M Trevisan.....	283
Modelling pesticide inputs into surface waters in Germany B Röpke, M Bach and H G Frede.....	289
Characterisation of the structure of spatial variability for initial pesticide concentration in a field trial C Vischetti, L Scarponi, A Esposito, M Vianello <i>et al.</i>	295
Predicting atrazine transport into subsurface tile-drained soil using the HYDRUS-2D model: lysimeter study G Abdel-Nasser	301

RISK MANAGEMENT

Pesticide trends in raw and treated drinking water D C Hillier and S L White	307
Watershed monitoring to address contamination source issues and remediation of these contaminants P L Barnes and D L Regehr.....	313
Catchment scale risk-mitigation experiences – key issues for reducing pesticide transport to surface waters J Kreuger and E Nilsson.....	319
The effectiveness of a stewardship campaign in Severn Trent Water G Hankinson and G Welland	325

Catchment monitoring for pesticides – Unilever Colworth sustainable agriculture project T J Pepper, S J Groves and D Pendlington.....	333
A method for a diagnosis of the risk of pesticides transfer at field scale: principles, implementation and first results in Bretagne (Brittany) F Laubier.....	339
Herbicide flow from two types of hard surfaces in urban areas: first results for glyphosate and diuron G Angoujard, N Le Godec, L Lefevre and P Blanchet.....	345
Modelling pesticide residues in irrigation water: managing their impact on non-target cultures and the environment R Quental-Mendes, T Vinhas, P Viana, M Pereira and P Antunes.....	351

SESSION 8

RISK MANAGEMENT

Predicted impact of transgenic crops on water quality and related ecosystems in vulnerable watersheds of the United States T L Estes, R Allen, R L Jones, D R Buckler <i>et al.</i>	357
Evaluation of best management practices in a midwestern watershed G F Czapar, T J Lively, M S Cochran, D P Tierney <i>et al.</i>	367
Management practices to minimise atrazine loss in surface water runoff D L Regehr, P L Barnes, D L Devlin, R J Rector and M A Hoobler	373
The design of a pesticide handling and washdown facility S C Rose, P J Mason, I D L Foster, A Walker and A D Carter	379
Policy, practice and partnership: pragmatism or perfection in farming? D Brightman and A D Carter	385

SESSION 9

HERBICIDES IN THE ENVIRONMENT: EXPOSURE, CONSEQUENCES AND RISK ASSESSMENT – PART 1

FOCUS surface water scenario development D A Yon, P I Adriaanse, R Allen, E Capri <i>et al.</i>	397
The influence of wind speed and spray nozzle geometry on the drift of chlorpyrifos to surface water T J Pepper, D J Arnold, C Murray and G L Reeves.....	405
Prediction of field efficacy from greenhouse data for four auxenic herbicides J P Wright and A R Thompson	411

SESSION 10
HERBICIDES IN THE ENVIRONMENT: EXPOSURE,
CONSEQUENCES AND RISK ASSESSMENT – PART 2

Biodiversity, herbicides and non-target plants E J P Marshall	419
Terrestrial non-target plant testing and assessment: the conservative nature of the process J J Dulka	427
Recent developments in non-target terrestrial plant test protocols and risk assessment P Ashby.....	437
Assessing the potential risks of herbicides to non-target aquatic plants S J Maund, R Grade, J F H Cole and J Davies.....	445
