

SYMPOSIUM PROCEEDINGS No. 83

Seed Production and Treatment in a Changing Environment

Chaired by A J Biddle

Proceedings of an international Symposium,
held at The Belfry Resort Hotel, Wishaw, Warwickshire, UK

24–25 February 2009

Contents

Preface	vi
Symposium Organising Committee	vii
Acknowledgements	vii
Session A Seed production and quality	
<i>Organiser – Valerie Cockerell</i>	
Requirements and demands on seed for peas and beans in the UK <i>A J Biddle</i>	1
Reducing risks in a changing environment for UK potato production <i>S J Wale</i>	5
Seed quality development <i>R H Ellis</i>	11
Session B New products and uses	
<i>Organiser – Malcolm Tomkins</i>	
The development of seed treatment products based on the new fungicide ipconazole <i>M J Tomkins, S J Maude, T Archer, K M Littlewood and D Jackson</i>	17
Spinosad: an effective, organic seed treatment insecticide for certain vegetable crops <i>K W Dorschner, A G Taylor, B A Nault and D B Walsh</i>	23
Neonicotinoid seed treatments for early-season management of cucumber beetles in cucurbits <i>T Kuhar, H Doughty, G Brust, J Whalen, C Welty, B Nault and A Taylor</i>	25
A new treatment for spinach seed with efficacy against seed- and soil-borne fungal pathogens, in particular <i>Verticillium dahliae</i> <i>G Kinsey</i>	31
Pest and virus control in winter oilseed rape in northern Europe using a clothianidin-based seed treatment <i>N M Adam</i>	37
Session C Application technology, formulation and safe use	
<i>Organiser – Adrian Cottey</i>	
Smart pellet technology for safe and accurate insecticide applications <i>F Tetteroo, S Kofman and B Legro</i>	43
Formula M – innovative formulation technology for cereal seed treatments <i>L Mittermeier, B Hussherr, S Baum and F Guyon</i>	50

Session D Efficacy

Organisers – Rae Cook and Will Holmes

ThermoSeed treatment – a novel disinfection technology for vegetable seeds <i>G Forsberg and V Sanchez-Sava</i>	53
Seed treatment as an additional tool to minimise mycotoxin contamination in cereals <i>M Klix, M Oostendorp and R Zeun</i>	59
Seed treatments for the control of onion neck rot (<i>Botrytis allii</i>) <i>K R Green</i>	64
Quality management in seed treatment from harvesting to planting <i>F Brandl, A Leuenberger, B Hussherr and W Fischer</i>	71
Uptake of model compounds by soybean, switchgrass and castor seeds applied as seed treatments <i>Y A Salanenka and A G Taylor</i>	76

Session E Interpretation of results and epidemiology

Organiser – Steve Roberts

Transmission and spread of <i>Xanthomonas campestris</i> pv. <i>campestris</i> in brassica transplants: implications for seed health standards <i>S J Roberts</i>	82
Occurrence and importance of seed-borne <i>Bipolaris sorokinana</i> in Norwegian barley <i>G Brodal and H Tangeraas</i>	86
Potential risk of contaminated seed as a source for foliar disease in barley – should we take the risk more seriously? <i>S J P Oxley, N D Havis and J M Fountaine</i>	92
Spring cereal seed infected with <i>Microdochium nivale</i> : cause for concern? <i>V Cockerell, M Jacks and M McNeil</i>	95
Relationship between seedling emergence in winter wheat and levels of <i>Microdochium nivale</i> DNA determined by real-time PCR <i>M McNeil and V Cockerell</i>	102

Posters

Organiser – Roger Vickers

Seed testing preventing the introduction of quarantine pathogens <i>K J D Hughes, V L Barton, J Elphinstone and R Mumford</i>	108
A laboratory test to evaluate the selectivity of seed treatments in cereals <i>B Mériaux and C Doucet</i>	110
The effect of substrate when testing standard germination of treated maize seed <i>B Hamman and G Koning</i>	113

An electrotherapy technique for eliminating a major seed-borne virus of common bean <i>M H Hormozi-Nejad, J Mozafari and F Rakhshandehroo</i>	115
The development of an ipconazole microemulsion formulation for seed treatment <i>R M Clapperton and K M Littlewood</i>	119
A novel approach in priming technology for sugar beet seed <i>V Heyes and S Harper</i>	128
The effect of thiamethoxam on the early growth of wheat, oilseed rape and maize seedlings <i>N J Wooliscroft and M C Hare</i>	129
Response of green beans to <i>Rhizobium</i> inoculation of the seed bed <i>A J Biddle and S Thompson</i>	134
Plant growth regulatory effects of azole fungicides used as seed treatment <i>D Portz and A Suty-Heinze</i>	138
