

# Stored Products Pest Control

BCPC Monograph No. 37

Proceedings of a Symposium organised by the  
British Crop Protection Council, the  
British Pest Control Association and the  
Society of Food Hygiene Technology held at  
the University of Reading  
25th–27th March, 1987

Edited by T. J. LAWSON

Society of  
Food Hygiene  
Technology

PREFACE	viii
ACKNOWLEDGEMENTS	viii
PROGRAMME COMMITTEE AND SESSION ORGANISERS	ix
ABBREVIATIONS	x
1. THE NEEDS AND PROBLEMS OF THE FOOD INDUSTRY	
Food industry standards – their trends and significance in stored product pest control	
G. BARNES	3
Pest control in cereal processing – a health food industry view	
P. REDGATE	9
Limiting the damage from storage pests and from their control – a government view	
P. J. BUNYAN	21
2. FUNGAL PROBLEMS AND THEIR CONTROL	
The occurrence and significance of moulds and mycotoxins in cereals and animal feedstuffs in the United Kingdom	
K. A. SCUDAMORE and A. E. BUCKLE	33
The influence of water and temperature on germination and growth of fungi causing spoilage of stored grain	
N. MAGAN and J. LACEY	43
Effects of modified atmospheres on moulding and mycotoxin development	
N. PASTER	53
The influence of gamma irradiation on aflatoxin formation by <i>Aspergillus flavus</i> in maize seeds in controlled environmental conditions	
J. E. SMITH, R. G. CUERO and J. LACEY	63
Detection of fungi in stored grain	
A. KASPERSSON	71
A new approach to routine aflatoxin testing	
D. THOMSON	79
3. RODENT PROBLEMS AND THEIR CONTROL	
The occurrence and significance of rodenticide resistance in the U.K.	
A. D. MACNICOLL and J. E. GILL	89
Feeding behaviour, social interactions and poison bait consumption by family groups of wild rats living in semi-natural conditions	
D. S. SHEPHERD and I. R. INGLIS	97
The contribution of field studies to stored product rodent control	
M. FENN and D. MACDONALD	107
Performance and environmental studies with the new anticoagulant rodenticide flocoumafen	
B. GARFORTH and R. A. JOHNSON	115

Flupropadine – a new rodenticide R. L. MORGAN and E. W. PARNELL	125
Bromethalin – an alternative to anticoagulant rodenticides S. SPAULDING	137
<b>4. DETECTION OF INSECT INFESTATIONS</b>	
Recent developments in techniques for the detection of insect pests J. CHAMBERS	151
Further developments in traps used to detect low level infestations of beetle pests in bulk stored grain P. COGAN and M. WAKEFIELD	161
Commercial development of pheromone based monitoring systems for insect pests of stored products O. JONES	169
<b>5. CHEMICAL CONTROL OF INSECT INFESTATIONS</b>	
Insecticide resistance in stored product beetles and its consequences for their control J. MUGGLETON	177
Insecticide repellency in the rust-red flour beetle ( <i>Tribolium castaneum</i> ) K. WILDEY	187
New approaches to the protection of stored products using an insect juvenile hormone analogue J. EDWARDS, J. E. SHORT and L. ABRAHAM	197
<b>6. PHYSICAL CONTROL OF INSECT INFESTATIONS</b>	
An introduction to physical control, its practical potential and some examples of its use F. FLEURAT-LESSARD	209
Controlling insects and mites by cooling grain with ambient aeration D. M. ARMITAGE	219
Application of modified atmospheres for controlling stored grain insects S. NAVARRO	229
Treatment of grain with low oxygen atmospheres containing carbon dioxide C. H. BELL	237
Disinfestation of edible nuts by means of microwave heating D. R. WILKIN and G. NELSON	247
<b>7. SUMMARIES OF POSTER PRESENTATIONS</b>	
Rodent control in stored products A. BUCKLE and M. RAMPAUD	257
Deltamethrin for grain protection J. DUGUET	259
Different effects of some antioxidants on the production of aflatoxins on starchy and oily seeds S. PASSI <i>et al</i>	261

Acid treatment of grain – a risk for growth of <i>Aspergillus flavus/parasiticus</i> and aflatoxin formation T. HOLMBERG and A. KASPERSSON	263
The use of behaviour modifying chemicals in monitoring insect pests of stored products SARAH JENKINS, O. JONES and T. WYATT	265
A recirculatory fumigation technique for stacked commodities M. KELLY	267
The effects of two ammonium propionate formulations on growth <i>in vitro</i> of <i>Aspergillus</i> species from hay. N. MAGAN and J. LACEY	269
Electronic rodent deterrents: do they work? R. H. MONRO and A. P. MEEHAN	271
Traps for detecting stored product insects: are they reliable? J. NEWTON	273
A survey of the incidence of booklice in the domestic kitchen environment B. TURNER and HANNAH MAUDE-ROXBY	275
The role of mating stimuli and seed availability in determining the egg maturation rate of the bean weevil <i>Callosobruchus maculatus</i> K. WILSON and L. HILL	277
