The Conference was organised by the British Crop Protection Council. The proceedings may be obtained from Mr. A. W. Billitt, Clacks Farm, Boreley, Ombersley, Droitwich, WR9 0HX.
CONTENTS
(Vol. 1)

TUESDAY, 16TH NOVEMBER 1976

Session 1

THE BAWDEN MEMORIAL LECTURE

The importance of weeds to world food production

L. HOLM .......................................................... (Vol. 3)

Session 2

WEED MANAGEMENT AND CONTROL IN CEREALS

A quick low cost survey of wild oats in barley in North East Scotland

E.E. SCRAGG, D.W. KILGOUR and H.M. CARNEGIE ........................................ 1

Wild-oat control and yield response in wheat treated with flamprop-methyl

P.P. WARLEY and S. MASHEDER .................................................. 9

The effect of timing of the application of flamprop methyl on its action

on graminaceous weeds in winter and spring wheat

R.O. MORRIS, R.J. LUCKHURST, J.S. LIDDEI and F.R. STOVELL ..................... 17

The control of *Avena fatua* in winter wheat by the use of post emergence

herbicides applied at different timings

J.H. BALDWIN and D.B. LIVINGSTON ........................................... 25

The control of *Avena fatua* in spring barley using post emergence

herbicides

J.H. BALDWIN and R.J. FINCH .................................................. 31

Time of application of herbicides for *Avena fatua* control in spring wheat

and barley

B. PESSALA ................................................................. 39

The effect of light, temperature and humidity on the control of *Avena*

fatua with difenzoquat

D. COUPLAND, J.C. CASELEY and R.C. SIMMONS .................................... 47

Trials in the U.K. with phenoxy-phenoxypropionic acid derivatives for

grass weed control in winter cereals

R.T. HEWSON ................................................................. 55

Chemical control of Alopecurus myosuroides in winter cereals

K.R. HUBBARD, D.B. LIVINGSTON and B.L. ROSS ................................ 63

Session 3B

RERAINTS TO THE PRACTICE OF WEED CONTROL IN DEVELOPING COUNTRIES

Weed research requirements in developing countries
C. PARKER ........................................................................ (Vol. 3)

The analysis of weed growth in hand hoeed experiments
J. OGBORN ........................................................................ 151

Aspects of development and education in the use of herbicides in developing countries
J. DOLL ............................................................................ (Vol. 3)

A new approach towards easy application for cotton herbicides in Egypt
M.K. ZAHRAN, T.S. IBRAHIM and M.I. EL-MIGHRABY .......... 159

The case for weed control to spearhead improvements in maize and cotton husbandry in Swaziland
M.S. ARMITAGE and C.E. BROOK ........................................ 165

Opportunities and limits in use of herbicides in developing countries
H. AEBI ........................................................................... (Vol. 3)

Session 4A

WEED MANAGEMENT AND CONTROL IN CASH ROOT CROPS

The role of herbicides in highly mechanised cash root crop production
J.S. GUNN ........................................................................ (Vol. 3)

Some effects of timing of weed control in the sugar beet crop
R.K. SCOTT, S.J. WILCOCKSON and N.R. POORE .................. 173

Ethofumesate - post-emergence use in sugar beet
H.M. HOLMES, J.R. DONSEITT, W. GRIFFITHS and S.D. HORNE 181

The development of metamitron, a highly selective and versatile herbicide, for use on sugar beet in the U.K.
D.B. MORRIS, P.A. BIRCH and P.W. ROSE ......................... 189

Use of metamitron in weed control systems in sugar beet
H. HACK and R.R. SCHMIDT ............................................... 197

Control of weed beet in cereals
P.C. LONGDEN, M.G. JOHNSON and L.G. COPPING ............... 203
Investigations into methods of improving the performance of metoxuron against volunteer potatoes
P.J.W. LUTMAN .......................................................... 211

Herbicide usage on maincrop potatoes in Great Britain
J.J.H. TAYLOR .......................................................... 217

The use of low rates of lenacetil in an effective and safe programme of weed control in sugar beet
J.P. DOUCHET, M. ABSI, M. DE TROZOFF and M. COGNET ................................................ (Vol. 3)

Session 4A

HERBICIDE MODE OF ACTION

Structure-activity relationships in a group of carbamoyltriazole herbicides
R.F. BROOKES, L.G. COPPING and B.V. SCARBOROUGH .......................................................... (Vol. 3)

Paraquat, peroxide and superoxide
J.A. FARRINGTON .......................................................... 225

Herbicides which affect protein synthesis in plants
R. BAXTER .......................................................... 229

Experiments into the mechanism of action of the photosynthetic inhibitor herbicide, monuron
K.E. PALLET and A.D. DODGE .......................................................... 235

Session 5A

STRATEGIC PLANNING FOR WEED CONTROL

A planned approach to wild oat and grass weed control, integrating herbicides with cultural methods on a large cereal and grass farm
R.H. JENKINSON and P.J. HONOUR .......................................................... (Vol. 3)

Planned weed control in the arable crops of Eastern England
W.E. BRAY .......................................................... (Vol. 3)

Session 5B

WEED MANAGEMENT AND CONTROL IN FRUIT AND ORNAMENTAL CROPS

Soil management with herbicides - the response of soils and plants
D. ATKINSON .......................................................... (Vol. 3)

The effect of different soil-management systems and herbicides on the growth and cropping of raspberries
D.V. CLAY and J.G. DAVISON .......................................................... 241
The effect of 8 years of different soil-management treatments in raspberries on weed seed and worm populations, soil microflora and on chemical and physical properties of the soil
D.V. CLAY and J.G. DAVISON .................................................. 249

The control of annual weeds in newly-planted and established strawberries
N. RATH and T.F. O'CALLAGHAN ................................................. 259

The response of strawberry cultivars to mixtures of phenmedipham with other herbicides and with mineral oils
D.V. CLAY and W. ABERNETHY .................................................. 265

The response of four varieties of strawberry to 2,4-D applied on five dates in the year of planting
J.G. DAVISON and J.A. BAILEY ................................................. 273

Experiments on the limitation of cane growth in raspberry rows
H.M. LAWSON and J.S. WISEMAN ............................................... 281

Glasshouse screening of materials for chemical pruning of young raspberry canes
J.S. WISEMAN ............................................................................. 289

The response of Convolvulus arvensis to 2,4-D applied alone or in mixtures with paraquat and aminotriazole
J.A. BAILEY and J.G. DAVISON ................................................. 295

Weed competition and the performance of established apple trees
D. ATKINSON and R.I.C. HOLLOWAY ........................................... 299

The response of pears and apples growing in sand to 2,4-D, MCPA and 2,4,5-T applied to the roots
J.G. DAVISON and D.V. CLAY .................................................. 305

Norflurazon herbicide for weed control in fruit trees, nut trees and other perennial crops in the U.S.A.
E. UMMEL, C. KEEFER, L. RUSSO, T. HOLT and A. RIGGENBACH ........ 313

Control of Oxalis pes-caprae L. with pre-emergence and post-emergence treatments
M. DAMANAKIS ........................................................................... 321

The tolerance of newly planted ornamentals to a range of contact herbicides
W. ABERNETHY and S. WARD .................................................. 329

Further information on the tolerance of woody ornamentals to simazine
D.W. ROBINSON and J.C. KELLY ................................................ 333

Weed control in narcissus with herbicides applied post-flowering
H.M. LAWSON and J.S. WISEMAN ............................................... 341
VEGETATION MANAGEMENT IN AMENITY AND INDUSTRIAL AREAS

Dikegulac: a novel growth retardant and branching agent for hedges
W.H. DE SILVA, H.R. GRAF and H.R. WALTHER ........................................ 349
The Conference was organised by the British Crop Protection Council. The proceedings may be obtained from Mr. A. W. Billitt, Clacks Farm, Boreley, Ombersley, Droitwich, WR9 0HX.

The Conference was organised by the British Crop Protection Council. The proceedings may be obtained from Mr. A. W. Billitt, Clacks Farm, Boreley, Ombersley, Droitwich, WR9 0HX.
PREFACE

The Conferences at Brighton organised by the British Crop Protection Council as the Weed Control Conference and the Insecticide and Fungicide Conference have been unified and are being referred to as the British Crop Protection Conference from 1976 onwards. They are continuing as before to deal with Weeds and with Pests and Diseases in alternate years. The present Conference would have been the 13th British Weed Control Conference under the old designation.

Volumes 1 and 2 of the Proceedings contained most of the research reports submitted and accepted before the Conference. This volume contains the text of the Bawden Memorial Lecture, the prize-winning Bawden Memorial Essay, the invited papers presented in Sessions at the Conference and a few research reports which for various reasons were not included in Volumes 1 and 2.

ATTENDANCE AT THE 1976 BRITISH CROP PROTECTION CONFERENCE – WEEDS

At this Conference there were 1613 delegates registered, of which 803 delegates came from 42 countries other than the U.K.
Opportunities and limitations in the use of herbicides in developing countries
H. AEBI ................................................................. 817

Session 4A
WEED MANAGEMENT AND CONTROL IN CASH ROOT CROPS

The role of herbicides in highly mechanised cash root crop production
J.S. GUNN .............................................................. 831

The use of low rates of lenacil in an effective and safe programme of weed control in sugar beet
J.P. DOUCHET, M. ABSI, M. de TROGOFF and M. COGNET ......................... 839

Session 4B
HERBICIDE MODE OF ACTION

Structure - activity relationships in a group of carbamoyltriazole herbicides
R.F. BROOKES, L.G. COPPING and B.V. SCARBOROUGH ............................ 847

Session 5A
STRATEGIC PLANNING FOR WEED CONTROL

A planned approach to wild oat and grass weed control, integrating herbicides with cultural methods on a large cereal and grass farm
R.H. JENKINSON ...................................................... 857

Planned weed control in the arable crops of Eastern England
W.E. BRAY ............................................................... 865

Session 5B
WEED MANAGEMENT AND CONTROL IN FRUIT AND ORNAMENTAL CROPS

Soil management with herbicides - the response of soils and plants
D. ATKINSON and G.C. WHITE ......................................... 873

Session 6A
APPLICATION OF HERBICIDES - METHODS AND EFFECTS

A review of research on controlled drop application at the ARC Weed Research Organization
G.W. CUSSANS and W.A. TAYLOR ....................................... 885
Control of annual broad-leaved weeds in spring barley by controlled drop application: comparisons of the activity of two herbicide mixtures at three doses and four volume rates
P. AYRES ................................................................. 895

Control of Avena fatua in spring barley by controlled drop application: comparisons of the activity of two herbicides at three doses and four volume rates
B. J. WILSON ............................................................... 905

Session 6B
WEED MANAGEMENT AND CONTROL IN EDIBLE LEGUMES AND VEGETABLES

The development of herbicide programmes for field vegetable crops
R. J. MAKEPEACE .......................................................... 915

Investigations into the addition of mineral oil to bentazone for post-emergence weed control in dwarf beans
J. M. KING and R. P. HANDLEY ........................................... 923

Session 6C
PLANT BREEDING AND GENETICS IN RELATION TO WEED RESISTANCE AND CROP SAFETY

The impact of herbicides on plant breeding
WATKIN WILLIAMS .......................................................... 931

The evolution of herbicide resistance in weeds and its implications for the farmer
R. J. HOLLIDAY, P. D. PUTWAIN and A. DAFNI ................................... 937

Session 7A
WEED MANAGEMENT AND CONTROL IN MINOR FIELD CROPS

The potential of minor field crops in British agriculture
E. S. BUNTING ................................................................. 947

Session 7B
WEED MANAGEMENT AND CONTROL IN GRASS AND FODDER CROPS

Weed management in grassland
T. H. DAVIES ................................................................. 955

The effects of seasonal applications of glyphosate on a mixed sward
A. K. OSWALD ................................................................. 961
Session 7C

HERBICIDE BEHAVIOUR IN SOIL

Relative importance of factors influencing the activity of herbicides in soil
D. RILEY and R.S. MORROD ......................................................... 971

Soil texture classification for the adjustment of herbicide dose
D.J. EAGLE ......................................................................................... 981

Session 8A

WEED MANAGEMENT AND CONTROL IN HERBAGE SEED CROPS

The effects of six herbicides with a potential for wild-oat control on ten direct and undersown grasses
A.K. OSWALD ............................................................................. 989

* See below for additional Research Report in this Session

Session 8B

INFLUENCE OF CHANGING HUSBANDRY ON WEEDS AND WEED CONTROL

The influence of changing husbandry on weeds and weed control in arable crops
G.W. CUSSANS ............................................................................. 1001

The influence of changing husbandry on weeds and weed control in horticulture
J.G. DAVISON and H.A. ROBERTS .................................................. 1009

The influence of tillage on the weed flora of four sites sown to successive crops of spring barley
F. POLLARD and G.W. CUSSANS .................................................... 1019

Session 9

CONTENTIOUS AND COMPLEX ISSUES IN WEED MANAGEMENT

Sequential uses of herbicides
P.W. SCARR ..................................................................................... 1029

Tank mix problems for advisors and users
P.J. LONG ........................................................................................ 1035

Clearance of herbicides for minor use recommendations
P.D.W. BIRCH .................................................................................. 1041

* The control of wild oats (Avena spp.) in ryegrass herbage seed crops
D.D. BARBER .................................................................................. 1047
