CONTENTS

(TVol. 1)

TUESDAY, 14TH NOVEMBER 1972

Session 1

HERBICIDES IN PERSPECTIVE - RESPECTIVE ROLES OF GOVERNMENT AND INDUSTRY

Invited speakers:

F. H. TSCHIRLEY .................................................. (Vol. 3)
R. F. GLASSER .................................................. (Vol. 3)

Session 2

OBJECTIVES OF WEED CONTROL IN ARABLE CROPS

Cereals

Principles and practice
M. EDDOWES .................................................. (Vol. 3)
Agronomic aspects
G. W. CUSSANS .................................................. (Vol. 3)
Agro-chemical aspects
W. GRIFFITHS .................................................. (Vol. 3)
The need for clean seed
C. F. PERTWEE .................................................. (Vol. 3)
A farmer's viewpoint
R. H. N. DASHWOOD ........................................... (Vol. 3)

Vegetables

Effects of weeds and herbicides on vegetable crops
J. M. KING .................................................. (Vol. 3)
The processor's problems and requirements
A. H. A. ELLIOTT .................................................. (Vol. 3)
Effects of weed control by herbicides on systems of production for vegetable crops
P. J. SALTER .................................................. (Vol. 3)
Weed control management in vegetable crops
D. J. HARRISON .................................................. (Vol. 3)
### Session 3A

**CONTROL AND BIOLOGY OF PERENNIAL WEEDS**

Some consideration of the relationship between biology, control and importance of certain perennial weeds

K. CARPENTER .......................................................... (Vol. 3)

### Weed control in fodder brassicas and vegetables using granular alachlor and propachlor

H. D. HODKINSON .................................................. 150

### The influence of activated charcoal on the tolerance of vegetable crops to soil-acting herbicides

D. J. ALLOTT and S. D. UPRICHARD .............................. 158

### Herbicide evaluation in brassica crops - 1968-72

J. C. CASSIDY .................................................. (Vol. 3)

### Field trials with 2-(4-chloro-6-ethylamino-s-triazin-2-ylamino)-2-methyl-propionitrile cyanazine) for weed control in brassicas

B. C. HADDOW, R. G. JONES and A. W. GILLESPIE .................. 166

### Pre- and post-emergence weed control in drilled onions

F. S. MACNAEIDHE ............................................. 173

### Post-emergence control of weeds in onions with methazole

C. BAKER and C. J. EDWARDS .................................. 180

### Experiments with methazole on onions and leeks

H. A. ROBERTS and W. BOND .................................... 185

### Properties of methazole (VCS-438) for development as a selective herbicide in agriculture

J. N. BARLOW and W. FURNESS .................................. 190

### Control of Compositae weed species in transplanted lettuce

S. D. UPRICHARD .................................................. 196

### Evaluation of herbicides for post-emergence application in carrots

F. S. MACNAEIDHE ............................................. 202

### Session 4A

**WILD OATS AND BLACKGRASS AND THEIR CONTROL**

### Wild oats - where next?

J. G. ELLIOTT .................................................. (Vol. 3)

### Blackgrass and its control

MISS J. M. THURSTON ........................................... (Vol. 3)

### Studies on the action and efficiency of chlorfenprop-methyl against *Avena fatua* L. (spring wild oats)

T. J. MARTIN, D. B. MORRIS and C. E. RIELEY ...................... 209

### Germination periodicity, plant survival and seed production in populations of *Avena fatua* L. growing in spring barley

R. J. CHANCELLOR and N. C. B. PETERS .......................... 218

### A study on the survival of wild oats (*Avena fatua*) seeds buried in farm yard manure and fed to bullocks

J. KIRK and A. D. COURTNEY .................................... 226
The effect of autumn cultivations on the emergence of *Avena fatua* seedlings
B. J. WILSON and G. W. CUSSANS ........................................... 234

Studies of the fate of *Avena fatua* seeds on cereal stubble as influenced by autumn treatment
B. J. WILSON ................................................................. 242

Field extension trials and a farmer usage survey with chlorfenprop-methyl for the control of *Avena fatua* L. in spring barley crops in the United Kingdom
J. D. FORREST, P. N. HODGSON and C. MYRAM ........................................... 248

The use of a mixture containing metoxuron and simazine for the post-emergence control of *Alopecurus myosuroides* in winter cereals
R. J. AYRES, C. J. EDWARDS and R. K. PFEIFFER ........................................... 256

Field experience of granular tri-allate for control of *Avena* spp. in winter and spring cereals
H. D. HODKINSON ................................................................. 263

The control of *Alopecurus myosuroides* by mechanical application of tri-allate granules
H. D. HODKINSON ................................................................. 271

Application of benzoylprop-ethyl and the effect on yield of wheat
F. R. STOVELL and D. J. BOWLER ........................................... 276

Chemical control of *Alopecurus myosuroides* in winter wheat
J. H. BALDWIN and D. B. LIVINGSTON ........................................... 281

Chemical control of *Avena fatua* in winter wheat
J. M. PROCTOR and D. B. LIVINGSTON ........................................... 288

The selectivity of post-emergence herbicides for *Avena fatua* control in spring wheat and barley
MISS C. FROST ................................................................. (Vol. 3)

Chemical roguing of *Avena* spp.
M. J. MAY ................................................................. 294

**Session 4B**

WEED CONTROL AND HERBICIDE USE
IN GRASS AND FODDER CROPS

The control of weed grasses in grassland

Selectivity of NC 8438 between ryegrass and weed grass species
A. M. BLAIR ................................................................. 301

The selective suppression of weed grasses in young perennial ryegrass swards by dalapon and asulam
A. K. OSWALD, R. J. HAGGER and J. G. ELLIOTT ........................................... 306
The control of perennial broad-leaved weeds in grassland

Docks in grassland, their influence on herbage productivity
A. D. COURTNEY ................................................................. 315

Herbicides for control of docks (Rumex spp.) in grassland
J. FRAME and R. D. HARKNESS .................................................. 323

The effect of asulam on bracken frond number, rhizome viability and frond carbohydrate ratios
D. J. MARTIN, G. H. WILLIAMS and J. C. RAYMOND ...................... 331

Control of bracken with asulam in the north of Scotland
E. B. SCRAGG, A. D. MCKELVIE and D. W. KILGOUR .......................... 335

Herbicide-assisted seeding techniques

Surface organic matter in relation to the establishment of fodder crops in killed sward
N. R. W. SQUIRES and J. G. ELLIOTT ........................................... 342

Effects of April and July applications of glyphosate, paraquat and dalapon on old permanent pasture
A. K. OSWALD ................................................................. (Vol. 3)

Session 4C

WEED CONTROL IN FRUIT

The role of herbicides in modern fruit management
M. G. BANWELL ................................................................. (Vol. 3)

Grass suppression by maleic hydrazide

The effects of maleic hydrazide and 2,4-D for sward control in an orchard of Cox's Orange Pippin 1965-1971
K. G. STOIT ................................................................. 348

The effects of repeated applications of the grass suppressant maleic hydrazide on an orchard sward and on the soil fauna
C. LYONS, N. MILSOM, N. G. MORGAN and A. STRINGER ..................... 356

Long-term ecological changes in sward composition following application of maleic hydrazide/2,4-D
A. J. WILLIS ................................................................. 360

Strawberries

The use of charcoal dips for protection against simazine damage in freshly planted strawberries
N. RATH and T. F. O'CALLAGHAN ........................................ 368

Tolerance of six strawberry varieties to phenmedipham applied shortly after planting
S. D. UPRICHARD ................................................................. 374

### Session 7B

**WEED CONTROL IN BEET, POTATO AND ARABLE LEGUMES**

Present and future weed control problems in beet, potato and arable legumes

J. H. BALDWIN (Vol. 3)

#### Beet and potatoes

- BAY 6339H, a new herbicide for weed control in sugar and fodder beets
  - H. HACK and R. R. SCHMIDT | 479 |
- Control of annual grasses and broad-leaved weeds in sugar beet with NC 8438
  - R. K. PFEIFFER and H. M. HOLMES | 487 |
- The effect of weeds on the sugar beet crop
  - R. K. SCOTT and F. R. MOISEY | 491 |
- The use of sugar beet herbicides on sandy soils
  - J. L. SHORT | 499 |
- Residual chemical weeding systems on sugarbeet
  - E. F. SULLIVAN, L. K. FAGALA and C. G. ROSS | 505 |
- The use of a mixture of trietazine and linuron for weed control in potatoes
  - A. P. BALL | 511 |
- The development of metribuzin in the UK for weed control in potatoes
  - H. G. MANNALL, M. E. DAVIES and S. H. WHITWORTH | 519 |

#### Arable legumes

- The use of trietazine and a trietazine/simazine mixture for weed control in peas
  - A. P. BALL, C. HARRIS and R. K. PFEIFFER | 528 |

Herbicide evaluation in peas and French beans 1971-72

J. C. CASSIDY (Vol. 3)
Grower trials with a mixture of trietazine and simazine in peas
C. J. EDWARDS and R. L. LAKE ........................................... 534

Post-emergence herbicide experiments in peas and dwarf beans
J. M. KING and R. P. HANDLEY ........................................... 539

Trial results obtained in soya beans with 3-isopropyl-1H-2,1,
3-benzo thiadiazin-4(3H)-one 2,2-dioxide
M. LUIB and J. C. VAN DE WEERD ........................................... 547

Results of field trials in the UK using bentazon (BAS 351H) for
weed control in peas
H. C. MAY and J. S. TAYLOR ........................................... 552

The evaluation of new residual herbicides to control mono-
cotyledonous and dicotyledonous weeds in processing peas
J. MEYER ................................................................. 559

Experiments to investigate the use of cyanazine as a herbicide on
light soils at successive growth stages of peas under varying
rainfall conditions
R. O. MORRIS ................................................................. 565

Control of grass weeds in field beans (Vicia faba); the
possibilities for inter-row treatment
B. J. WILSON and G. W. CUSSANS ........................................... 573

Session 7C

WEED CONTROL IN AMENITY HORTICULTURE

Results of differing techniques in the application of dichlobenil 7.5%
granules in forestry
D. H. SPENCER-JONES and D. WILSON ........................................... 578

Further experiments with 2,6-dichlorothiobenzamide (chlorthiamid) in
planted areas of softwoods
M. G. ALLEN and D. F. REID ........................................... 583

Further trials with atrazine for controlling grass weeds in British
Forestry
R. M. BROWN ................................................................. 591

Effect of herbicides when applied to narcissus and tulip pre and post-
flowering
J. B. BRIGGS ................................................................. 601

Experiments with pyrazone and chlorbufam in narcissus
H. M. LAWSON and J. S. WISEMAN ........................................... 608

Experiments on the use of terbacil on nursery stocks
J. C. KELLY ................................................................. 615

Lenacil as a herbicide in amenity horticulture
R. H. NEWMAN ................................................................. 621
# Session 8A

## FACTORS AFFECTING EFFICACY OF FOLIAGE-APPLIED HERBICIDES

**Leaf surface factors**
- R. C. KIRKWOOD .................................................. (Vol. 3)

**Application factors**
- P. C. FODEN .................................................. (Vol. 3)

## The effect of environmental factors on the performance of glyphosate against *Agropyron repens*
- J. CASELEY .................................................. 641

## Artefacts in controlled environment studies
- B. M. SAVORY and C. J. HIBBITT ............................... 648

## Some increases in the efficacy of foliage-applied herbicidal salts due to the addition of ammonium ions
- D. J. TURNER and M. P. C. LOADER ............................ 654

## Effects of spray properties on the placement and activity of herbicides: a research programme
- J. R. LAKE .................................................. 661
Session 8B

WEED CONTROL IN ARABLE FARMING SYSTEMS

Trends in chemical and cultural weed control systems
E. S. CARTER ......................................................... (Vol. 3)

Some current weed control research findings and practices in
Western Canada
H. A. FRIESEN ......................................................... (Vol. 3)

Trials in cereals with bentazon (3-isopropyl-1H-2,1,3-benzothiadiazin-
4(3H)-one 2,2-dioxide) in combination with hormones (BAS 3580 H and
BAS 3960 H)
B. H. MENCK and S. BEHRENDT ........................................ 666

The decay of residues of vegetation and of pure cellulose treated
with aminotriazole and paraquat
E. GROSSBARD, J. A. P. MARSH and G. I. WINGFIELD ...................... 673

Weed control in winter wheat in Eastern Washington
D. G. SWAN .......................................................... 681

A study of the growth of Agropyron repens (L) Beauv. during and after
the growth of spring barley as influenced by the presence of undersown
crops
G. W. CUSSANS ....................................................... 689

The use of cyanazine mixtures for weed control in cereals
R. J. LUCKHURST, M. G. Allen, P. C. O’DOHERTY ............................. 698

An assessment of the practice and potential for the joint application
of solution fertilizer and herbicides in the UK
J. E. PALMER .......................................................... 709

Late spraying of winter wheat
I. A. MUNRO .......................................................... 717

Control of annual broad-leaved weeds in winter wheat with herbicides
used primarily against Alopecurus myosuroides and Avena fatua
J. M. PROCTOR and R. H. CLARKE ........................................ 722

Long-term control of Alopecurus myosuroides in winter wheat
J. F. ROEBUCK .......................................................... 726

Comparison of systems of control of Avena fatua in spring barley
J. F. ROEBUCK and R. G. HUGHES ......................................... 731
Can weed problems be reduced by improving crop establishment? Some possibilities of enhancing cereal germination
D. J. OSBORNE ........................................ (Vol. 3)

Dormancy in weed species
M. A. HALL and P. F. WARING .................................... (Vol. 3)

The use of plant growth regulators in the control of *Agropyron repens*
J. CASELEY .......................................................... 736

The effect of some plant growth regulators on the sprouting of *Cyperus rotundus* and its response to herbicides
C. PARKER and M. L. DEAN ........................................ 744

Plant growth regulators as a pretreatment for sugar beet seeds
R. K. SCOIT, D. W. WOOD and F. HARPER ....................... 752

Stimulation of celery seed germination with plant growth regulators
T. H. THOMAS, D. PALEVITCH and R. B. AUSTIN ................ 760

The effect of chlorflurecol on the growth of turions of *Myriophyllum verticillatum* L.
T. O. ROBSON .......................................................... 766

The effects of plant growth regulatory chemicals on seed germination
R. J. CHANCELLOR and C. PARKER .................................. 772

The effect of plant growth regulators on dominance in *Agropyron repens* (L.) Beauv. rhizomes
R. J. CHANCELLOR and R. R. B. LEAKEY ............................ 778

THURSDAY, 16TH NOVEMBER 1972

Session 9

HERBICIDES IN SOIL

Root function and the soil
R. SCOTT RUSSELL and M. G. T. SHONE .......................... (Vol. 3)

Pesticide movement and availability in soils
I. J. GRAHAM-BRYCE .................................................. (Vol. 3)

The soil organo mineral complex in relation to herbicide activity and a possible means of forecasting persistence
R. G. BURNS ............................................................ (Vol. 3)

## Session 2

**Objectives of Weed Control in Arable Crops**

### Cereals

- **Principles and practice**
  - M. Eddowes .................................................. 887

- **An Agronomist's point of view**
  - G. W. Cussans .................................................. 892

- **A manufacturer's view of farmer benefits**
  - W. Griffiths .................................................. 900

- **The need for clean seed**
  - C. F. Pertwee .................................................. 908

- **A farmer's viewpoint**
  - R. H. N. Dashwood ............................................ 915

### Vegetables

- **A review**
  - H. M. Lawson .................................................. 919

- **The effects of weeds and herbicides on the growth and yield of vegetable crops**
  - J. M. King .................................................. 925

- **The effects of weeds on vegetable crops grown for processing**
  - A. H. A. Elliott .............................................. 932

- **Effects of weed control by herbicides on systems of production for vegetable crops**
  - P. J. Salter .................................................. 939

- **The function of management**
  - D. J. Harrison .................................................. 943
Session 3A
CONTROL AND BIOLOGY OF PERENNIAL WEEDS

Some considerations of the relationship between biology, control and importance of certain perennial weeds
K. CARPENTER ................................................................. 048

Session 3C
WEED CONTROL IN VEGETABLES

Herbicide evaluation in brassica crops - 1968-72
J. C. CASSIDY ................................................................. 058

Session 4A
WILD OATS AND BLACKGRASS AND THEIR CONTROL

Wild oats, where next?
J. G. ELLIOTT ................................................................. 065

Blackgrass (Alopecurus myosuroides Huds.) and its control
MISS J. M. THURSTON .................................................... 077

The selectivity of post-emergence herbicides for Avena fatua control in spring wheat and barley
MISS C. FROST ............................................................... 088

Session 4B
WEED CONTROL AND HERBICIDE USE IN GRASS AND FODDER CROPS

The effects of April and July applications of glyphosate, paraquat and dalapon on old permanent pasture
A. K. OSWALD ................................................................. 094

Session 4C
WEED CONTROL IN FRUIT

The role of herbicides in modern fruit management
M. G. BANWELL .............................................................. 1002
## Session 5
### CONSEQUENCES OF BRITAIN'S ENTRY INTO E.E.C.

(i) Agricultural policy affecting cropping systems

<table>
<thead>
<tr>

<tr>
<td>H. A. FRIESEN</td>
<td></td>
</tr>
</tbody>
</table>
Session 8C

THE CONTRIBUTION OF PLANT GROWTH REGULATORS TO WEED CONTROL

Can weed problems be reduced by improving crop establishment?
Some possibilities for enhancing seed germination
D. J. OSBORNE

Dormancy in weed species
M. A. HALL and P. F. WAREING

Session 9

HERBICIDES IN SOIL

Root function and the soil
R. SCOTT RUSSELL and M. G. T. SHONE

Herbicide movement and availability in soils
I. J. GRAHAM-BRYCE

The soil organo-mineral complex in relation to herbicide activity and a possible means of forecasting persistence
R. G. BURNS

Soil-applied herbicides in practice
K. HOLLY

Session 10

NEW HERBICIDES, PLANT GROWTH REGULATORS AND TECHNIQUES OF WEED CONTROL

Glyphosate - a plant growth regulator for sugarcane and sugar beets
L. E. AHLRICHS and C. A. PORTER

Some new herbicides effective against wild oats
R. L. WAIN

Phytocidal properties of several N-aryluronium and S-alkylisothiouronium arsonates
AHMED S. EL-NAWAWY, E. A. KADOUS and A. TAG EL-DIN

Phytocidal properties of some S-alkylisothiouronium 2:2-dichloropropionates and trichloroacetates
AHMED S. EL-NAWAWY, M. A. KHALIFA, M. A. ASHRY, A. TAG EL-DIN, A. M. MAREI
Chemical repression of *Agropyron repens* clones without soil cultivation
F. J. H. VAN HIELE and M de BOER ........................................ 1243
