The Conference was organised by the British Crop Protection Council.
The proceedings may be obtained from Mr. A. W. Billitt, Clacks Farm,
Boreley, Ombersley, Droitwich, WR9 0HX.
CONTENTS
(Vol. 1)

TUESDAY, 19TH NOVEMBER 1974

Session 1

THE BAWDEN MEMORIAL LECTURE

Research and development for Britain's future food supplies
H. C. PEREIRA ......................................................... (Vol. 3)

Session 2A

CONTROL OF GRASS WEEDS IN CEREALS

Development of difenzoquat, a selective herbicide against wild oats in Spain
F. GRUENHOLZ, A. MUÑOZ, J. Mª CLAVE and J. A. GARCIA LOBO ............ 1

Trials with difenzoquat for the control of wild oats (Avena spp.) in wheat and barley and on crop tolerance in wheat
R. J. WINFIELD ....................................................... (Vol. 3)

The control of wild oats in barley with flamprop-isopropyl under a wide range of West European conditions
A. P. WARLEY, A. J. SAMPSON, J. D. TIPTON and R. O. MORRIS ........... (Vol. 3)

The control of some important grass weeds of wheat with WL 29761
E. HADDOCK, D. JORDAN, A. MOUILLAC and A. J. SAMPSON ............... 9

Chemical control of Avena fatua in spring barley
J. H. BALDWIN and R. J. FINCH ......................................... 17

The effects of tri-allate and barban on the control of Avena fatua in spring barley, on the yield of barley and the presence of A. fatua seeds in the harvested grain
B. J. WILSON, G. W. CUSSANS and P. AYRES ............................ 25

Chemical control of Avena spp. in winter barley
J. M. PROCTOR and W. A. ARMSBY ........................................ 33

The control of Avena fatua in winter sown cereals with chlortoluron
R. H. TYSEY .............................................................. 41

Trials on wild oat (Avena ludoviciana, Durieu) control in winter wheat comparing new herbicides
P. CATIZONE ............................................................ 45
The effect of annual application of benzoylprop-ethyl on populations of *Avena fatua* and *Avena ludoviciana* in winter wheat
F. J. BRESLIN .................................................. (Vol. 3)

Control of wild oat with new chemicals in wheat and barley
E. A. SKORDA ...................................................... (Vol. 3)

**Session 2B**

**THE ENVIRONMENTAL IMPLICATIONS OF THE USE OF HERBICIDES**

The responsibilities of those who use herbicides
I. PRESTT ...................................................... (Vol. 3)

The need to use herbicides
R. F. NORMAN ................................................... (Vol. 3)

The environmental consequences of using herbicides
J. M. WAY ....................................................... (Vol. 3)

The effect of a single field application of very high rates of linuron and simazine on carbon dioxide evolution and transformation of nitrogen within soil
J. A. P. MARSH, H. A. DAVIES and E. GROSSBARD .............. 53

Some effects of grass weed control on the arthropod fauna of cereals
G. P. VICKERMAN ................................................ (Vol. 3)

Some environmental aspects of the use of asulam for bracken control in upland areas

**Session 3A**

**CONTROL OF GRASS WEEDS IN CEREALS**

Chemical control of *Alopecurus myosuroides* in winter wheat
K. R. HUBBARD and D. B. LIVINGSTON .......................... 67

Isoxoturon, a new selective herbicide for control of *Alopecurus myosuroides* in winter cereals
R. T. HEWSON ..................................................... 75

Development work with metoxuron formulated as a microgranule for weed control in winter cereals
E. L. UMKE, F. A. EDER, J. LICHTBLAUM and H. STOCKL ............ 83

Weed control in winter wheat with AC 92553 alone and in combination with other herbicides
A. I. KOVACS ..................................................... 91
Biology and cultural control of Poa trivialis in cereal crops
E. G. BUDD ................................................................. 99

Progress in the development of the isopropylamine salt of glyphosate for the control of Agropyron repens
H. D. HODKINSON .......................................................... 107

Trinulan (trifluralin + linuron) a new pre-emergence herbicide for control of annual grasses and dicot weeds in winter cereals
M. SNEL, J. V. GRAMLICH, J. BUENDIA, L. CALVANI, A. CASANOVA and R. DOHLER (Vol. 3)

Session 3B
PLANT GROWTH REGULATORS IN CROP PRODUCTION

Physiological and economic targets for plant growth regulators
T. H. THOMAS ................................................................. (Vol. 3)

Ancymidol, a new growth regulator for ornamental plants
M. SNEL and E. EYSELL .................................................. 115

2,3-Dihydro-5,6-dimethyl-1,4-dithiin-1,1,4,4-tetroxide, a novel plant growth regulator
R. W. NEIDERMYER, A. D. BREWER and F. D. JUDGE .................................. (Vol. 3)

PP528 - a new phenyl tetrazole plant growth regulator
D. J. F. ENGLAND ......................................................... 123

Use of a plant growth regulator mixture for parthenocarpic fruit setting in apple
G. K. GOLDWIN and W. W. SCHWABE ........................................ 131

The effects of combined application of chloromequat chloride and a herbicide mixture to wheat
U. WUNSCH ................................................................. 137

Session 4A
DICOTYLEDONOUS WEEDS IN CEREALS

Timing of herbicide spray application for broad leaved weed control in cereals
S. A. EVANS ................................................................. (Vol. 3)

Bromofenoxim + terbutylazine - a new contact herbicide combination for broad-leaved weed control in spring cereals
D. P. DEAVILLE .............................................................. 143

New results with bentazon and bentazon combinations in rice
M. LUIB and J. C. VAN DE WEERD ........................................ 151
### Some results with bentazone in mixtures with phenoxyalkanoic herbicides for use in cereals undersown with clover
A. J. P. FROST and K. U. JUNG .............................................. 157

### A new approach to weed control in winter cereals with autumn applications using methabenzthiazuron
D. C. CLARK, R. J. LLOYD, R. A. JEFFREY and C. MYRAM ..................... 163

### Weather limitations on cereal spraying in the spring
D. R. TOTTMAN and A. PHILLIPSON ............................................. 171

#### Session 4B

**ENHANCEMENT OF HERBICIDE EFFICIENCY**

### Possible approaches to enhancement of herbicide efficiency
J. C. CASELEY .......................................................... (Vol. 3)

#### Session 4C

**WEED CONTROL IN AMENITY, AQUATIC, FORESTRY AND NON-CROPPED AREAS**

### Aquatic weed control

Report on the 4th International Symposium on Aquatic Weed Control, Vienna, September 1974
T. C. ROBSON .......................................................... (Vol. 3)
The effect of spraying large plots of *Nuphar lutea* (L.) (yellow water-lily) with glyphosate
P. R. F. BARRETT .......................................................... 229

Trials with terbutryne for the control of aquatic weeds
T. G. MARKS ................................................................. 233

Field trials with cyanatryn (WL 63611) for the control of aquatic weeds
B. C. HADDOW, P. R. STOVELL and D. H. PAYNE .................. 239

Further studies on the seasonal changes in the susceptibility of some emergent water plants to dalapon
P. R. F. BARRETT and T. O. ROBSON .................................. 249

**Forestry**

Testing various herbicides, including diphenamid and propham, for weed control in seedbeds of Sitka spruce (*Picea sitchensis* Bong. Carr.)
R. M. BROWN ............................................................. 255

The control of grasses and broadleaved weeds with propyzamide in young forest trees
A. S. PEDDIE ............................................................. 265

An evaluation of methods and timing of application of candidate selective herbicides in young forest plantations
M. G. ALLEN ............................................................. 271

**Amenity and non-cropped areas**

The use of glyphosate for weed control in amenity and non-cropped areas
H. D. HODKINSON ........................................................ (Vol. 3)

3-cyclohexyl-6-(dimethylamino)-1-methyl-1,3,5-triazine-2,4(1H,3H)-dione (DPX 3674) - a new non-selective herbicide with contact and residual properties
D. A. ALLISON and T. D. JOYCE .................................... 279

Ammonium ethyl carbamoylphosphonate (DFX-1108) - a new growth regulator for the control of undesirable brushwood species
M. H. NIEHUIS and K. J. ROEDIGER ................................ (Vol. 3)

WEDNESDAY, 20TH NOVEMBER 1974

**Session 5**

CROPS AS WEEDS

Cereals as weeds
R. G. HUGHES ............................................................ (Vol. 3)
Research on the control of volunteer potatoes in the Netherlands
L. M. LUMKES .......................................... (Vol. 3)

Factors affecting the overwintering of volunteer potato tubers and the emergence of sprouts in the spring
P. J. W. LUTMAN .......................................... 285

Experiments examining the potential of ten residual herbicides for the control of volunteer potatoes
P. J. W. LUTMAN .......................................... 293

Sugar beet as a weed
P. C. LONGDEN .......................................... 301

Volunteer crop problems in the processing industry
J. M. KING .................................................. 309

The control of raspberry suckers in uncultivated plantations
H. M. LAWSON and J. S. WISEMAN ......................... 315

Problems caused by wild and regenerating hop plants
J. M. THRESH and P. J. ORMEROD ......................... 323

Weeds as crops
J. P. HUDSON ............................................. 333

Session 6A

MINIMUM CULTIVATION TECHNIQUES IN RELATION TO WEED CONTROL

Development in direct drilling in the United Kingdom
J. G. ELLIOTT ............................................. (Vol. 3)

Motivation and response in the development of minimal cultivation techniques outside the UK
G. A. WATSON ............................................. (Vol. 3)

The decay of cereal straw after spraying with paraquat and glyphosate
E. GROSSBARD and S. L. COOPER ......................... 337

The development of the weed flora after several years direct drilling in cereal rotations on different soils
G. BACHTHALER ............................................. (Vol. 3)

Control of Agropyron repens by herbicides and crop rotation in a zero-tillage system
D. TIEDAU, W. NUYKEN and K. BARUMER .................. 345

Minimal cultivation techniques on blowing soils especially referring to the growing of sugar beet and potatoes in rye as a cover crop
L. M. LUMKES ............................................. (Vol. 3)
### Reduced cultivations: an economic assessment of two examples of the "spring cleaning" technique in France
J. F. ROQUES

### New techniques for seed bed preparation for break crops
F. BONCIARELLI and A. CARDINALI

### The effect of diquat and paraquat applied to seeds
V. STECKO

### The results from 7 years research into minimal and zero tillage techniques for maize in Romania
N. SARPE

### The effect of method of seed bed preparation on maize (Zea mays L) and barley (Hordeum sativum Jess) yields
P. C. PALMER, B. P. O'CONNOR and A. G. MACKAY

### Session 6B
**WEED CONTROL IN ARABLE LEGUMES AND VEGETABLES**

**Evaluation of AC 92553 for weed control in vegetable crops**
H. A. ROBERTS and W. BOND

**Weed control in lettuce on organic soil**
F. S. MACNAEIDHE

**Weed control programmes for canning carrots**
H. M. LAWSON and J. S. WISEMAN

**The evaluation of bentazone for weed control in processing legumes**
R. P. HANDLEY and J. M. KING

**New uses of trifluralin in vegetable crops**
D. M. FARRANT and J. H. BRYANT

**Experiments with bentazone for control of weeds in dwarf beans**
H. C. MAY

**The control of weeds in green beans (Phaseolus vulgaris)**
R. O. MORRIS

**Weed control in runner and dwarf beans with trifluralin and bentazone**
H. A. ROBERTS, W. BOND and M. E. RICKETS

**Herbicides for use in chicory**
J. H. BALDWIN and W. A. ARMBSBY

**The evaluation of a combination, chlorthalmethyl + methazole, (S 1445) for weed control in arable and leguminous crops**
E. BOSCH, J. MEYER and W. SCHAREN
Oryzalin + linuron, a new herbicide combination for pre-emergence weed control in soybeans
F. HUGGENBERGER, N. SARPE and O. LESNIUC ........................................ 447
Weed control programme for vining peas
H. M. LAWSON and J. S. WISEMAN ............................................................... 453
## Session 7A

CONTENTS
(Vol. 3)

Session 1
THE BAWDEN MEMORIAL LECTURE
Research and development for Britain’s future food supplies
H. C. PEREIRA ................................................................. 857

THE BAWDEN ESSAY
The role of plant protection in agriculture and horticulture
B. V. SCARBOROUGH ........................................................... 869

Session 2A
CONTROL OF GRASS WEEDS IN CEREALS
Trials with difenzoquat for the control of wild oats (Avena spp.) in wheat and barley and on crop tolerance in wheat
R. J. WINFIELD ................................................................. 875
The control of wild oats in barley with flamprop-isopropyl under a wide range of West European agronomic conditions
A. P. WARLEY, A. J. Sampson, J. D. TIPTON and R. O. MORRIS ........... 883
The effect of repeated annual application of benzoylprop-ethyl on populations of Avena fatua and Avena ludoviciana in winter wheat
F. J. BRESLIN ................................................................. 893
Control of wild oats with new chemicals in wheat and barley
E. A. SKORDA ................................................................. 901

Session 2B
THE ENVIRONMENTAL IMPLICATIONS OF THE USE OF HERBICIDES
The responsibilities of those who use herbicides
I. PRESTT ................................................................. 913
The environmental impact of the use of herbicides: the need for herbicides
R. F. NORMAN ................................................................. 917
The environmental consequences of herbicide use
J. M. WAY ................................................................. 925
Some effects of grass weed control on the arthropod fauna of cereals
G. P. VICKERMAN ............................................................ 929
Session 3A

CONTROL OF GRASS WEEDS IN CEREALS

Some observations on herbicidal efficacy and crop selectivity of trifluralin-linuron in winter cereals
M. SNEI, J. V. GRAMLICH, P. F. WASHBROOKE, A. CASANOVA and R. DOHLER .......... 941

Session 3B

PLANT GROWTH REGULATORS IN CROP PRODUCTION

Physiological and economic targets for plant growth regulators
T. H. THOMAS ............................................................ 949

2,3-dihydro-5,6-dimethyl-1,4-dithiin-1,1,4,4-tetroxide a novel plant regulant
R. W. NEIDERMYER, A.D. BREWER and F. D. JUDGE ................................. 959

Session 4A

DICOTYLEDONOUS WEEDS IN CEREALS

The timing of post-emergence herbicide spray application for broad-leaved weed control in cereals
S. A. EVANS ............................................................... 967

Session 4B

ENHANCEMENT OF HERBICIDE EFFICIENCY

Possible approaches to the enhancement of herbicide efficiency
J. C. CASELEY ............................................................ 977

To enhance or not to enhance, that is the question
J. W. WINCHESTER ..................................................... 987

Session 4C

WEED CONTROL IN AMENITY, AQUATIC, FORESTRY AND NON-CROPPED AREAS

Introduction to session on weed control in amenity, aquatic, forestry and non-cropped areas with special reference to the role of herbicides in amenity
D. W. ROBINSON ........................................................... 995

Report on the 4th International Symposium on Aquatic Weed Control, Vienna, September 1974
T. O. ROBSON ............................................................. 999
The use of a glyphosate salt for weed control in amenity and non-cropped areas
H. D. HODKINSON ................................................................. 1003

Ammonium ethyl carbamoylphosphonate: a new plant growth regulator for the control of undesirable brush-wood species
M. H. NIEBUSS and K. J. ROEDIGER ........................................... 1015

Session 5
CROPS AS WEEDS

Cereals as weeds
R. G. HUGHES ................................................................. 1023

Research on the control of volunteer potatoes in the Netherlands
L. M. LUMKES ................................................................. 1031

Session 6A
MINIMUM CULTIVATION TECHNIQUES IN RELATION TO WEED CONTROL

Developments in direct drilling in the United Kingdom
J. G. ELLIOTT ................................................................. 1041

Motivation and response in the development of minimal tillage techniques outside the United Kingdom
G. A. WATSON ................................................................. 1051

The development of the weed flora after several years' direct drilling in cereal rotations on different soils
G. BACHTHALER ............................................................... 1063

Protection of wind erosion (minimum cultivation techniques on soils susceptible to blowing when growing sugarbeet, potato, etc. in rye as a cover crop
L. M. LUMKES and H. A. te VELDE ........................................... 1073

Session 6B
WEED CONTROL IN ARABIL LEGUMES AND VEGETABLES

Weed control in lettuce on organic soil
F. S. MACNAEIDHE ............................................................ 1081

New uses of trifluralin in vegetable crops
D. M. FARRANT and J. H. BRYANT .......................................... 1089

Influence of herbicides on the development of nodule bacteria on the roots of soybeans
O. LESNIUC ................................................................. 1101
Session 7B

WEED SEEDS AND THEIR BEHAVIOUR

Correlations between climatic features of the plant’s environment and germination responses to temperature
P. A. THOMPSON ................................................................. 1109

Wind dispersal of weed seeds
F. M. BURROWS ................................................................. 1121

Seeds in ruderal soils, their longevity and contribution to the flora of disturbed ground in Denmark
S. ØDUM ........................................................................... 1131

Effect of long-term weed control measures on viable weed seeds in the soil
K. HURLE .......................................................................... 1145

Session 8A

WEED CONTROL IN POTATOES, SWEDES AND OIL SEED RAPE

Herbicide usage in maincrop potatoes in Great Britain
G. P. HAMPSON and J. A. H. TAYLOR ........................................... 1153

Session 8B

WEED CONTROL IN FRUIT AND ORNAMENTAL CROPS

The effects of weeds on fruit and ornamental crops
H. M. LAWSON ...................................................................... 1159

The results of research into the use of minimum and zero cultivation techniques in apple orchards in Romania
D. PRICA and N. SARPE ......................................................... 1171

Session 9

TECHNICAL AND ECONOMIC ASPECTS OF THE SUPPLY AND DEMAND FOR AGRICULTURAL CHEMICALS

Technical and economic aspects of the supply and demand for agricultural chemicals: Introduction
A. P. HALL ............................................................................ 1177

A merchant’s view
D. G. LIDSTONE ..................................................................... 1179

A farmer’s view
R. L. HOB CRAFT ..................................................................... 1183

Problems of herbicide usage on minor crops
J. D. WHITWELL ..................................................................... 1185
