

Opportunities for Molecular Biology in Crop Production

BCPC Monograph No 55

Proceedings of an International Symposium organised by the
SCI Pesticides Group in collaboration with the British Crop
Protection Council and held at Churchill College, Cambridge,
27-29th September 1993

Edited by: D.J. Beadle, D.H.L. Bishop, L.G. Copping,
G.K. Dixon and D.W. Hollomon

PREFACE	VIII
SYMPOSIUM PROGRAMME COMMITTEE	IX
CHAIRMEN OF SESSIONS	IX
ABBREVIATIONS	X
SESSION 1: ENGINEERING OF BIOPESTICIDES	1
A. Viral Insecticides	
Biology and ecology of baculoviruses	
J.S. CORY	3
Genetic engineering of baculoviruses	
J.M. VLAK	11
Field tests of genetically engineered baculoviruses	
R.D. POSSEE, M. HIRST, L.D. JONES, D.H.L. BISHOP and P.J. CAYLEY	23
B. Engineering of <i>Bacillus thuringiensis</i> toxins	
Genetics of <i>B. thuringiensis</i> toxins	
D. LERECLUS	37
Insecticidal activity of <i>B. thuringiensis</i> toxin	
D.J. ELLAR	45
Engineering <i>B. thuringiensis</i> toxins into other bacteria	
C. WAALWIJK	47
SESSION 2: SEARCH FOR NOVEL CROP PROTECTION AGENTS	59
A revolution in drug research: the impact of molecular biology on the pharmaceutical industry	
M.D. EDGE	61
Towards a rational design of pesticides	
S.G. FOSTER and R. HÖFGEN	75
Definition of novel pesticide targets and modes of action by molecular genetic approaches	
J.D. WINDASS, A. RENWICK and P.G. THOMAS	83
Mutational analysis and possible applications of ribosome inactivating proteins	
R. WALES, J.A. CHADDOCH, E.C. CORBEN, S.C. TAYLOR, L.M. ROBERTS, M.R. HARTLEY and J.M. LORD	99
Prospects for the genetic manipulation of antimicrobial plant secondary products	
R.A. DIXON and N. PAIVA	113
Manipulation of secondary metabolites for pest control	
J.A. PICKETT	119

	page
SESSION 3: TECHNIQUES AND APPLICATION OF CROP ENGINEERING	121
Transformation of plants for crop protection purposes	
M. DAVEY	123
Progress with transgenic plants and insect resistance	
R.T. FRALEY	125
Progress with transgenic trees	
D.J. JAMES	127
Dispersal of genes by pollen - the PROSAMO project	
P.J. DALE, R. PARKINSON AND J.A. SCHEFFLER	133
Releasing transgenic plants	
J.M. DUNWELL	143
Management of resistance to transgenic plants	
F. GOULD	151
SESSION 4: PROGRESS IN MAJOR CROPS	153
New opportunities in the breeding of wheat and barley through molecular biology	
G. MOORE	155
Progress in the breeding of corn	
R.R. FINCHER	163
Rice biotechnology: progress and prospects	
G.H. TOENNIESSEN	171
Advances in oilseed rape using biotechnology	
C.P. WERNER	187
Prospects for the modification of metabolism	
M.M. BURRELL, S.A. COATES, P.J. MOONEY and T. ap REES	197
New approaches to sugar beet improvement	
M.C. ELLIOTT, A. SLATER, M.R. FOWLER, J.S. GARTLAND, M.J. KIRBY and N.W. SCOTT	203
SESSION 5: IMPROVING PESTICIDE PERFORMANCE	215
Factors influencing immunogen design in pesticide immunoassay	
R.A. MURRAY	217
Understanding target populations through molecular biology: identification and quantification	
M.-C. GROSJEAN-COURNOYER, J. MUGNIER and R. BARDIN	227
The use of molecular biology for the identification and differentiation of individual isolates of fungal plant pathogens: facultative pathogens of the stem-base disease complex of cereals	
P. NICHOLSON and H.N. REZANOOR	229

	page
Understanding target populations through molecular biology: molecular genetic analysis of insecticide resistance A.L. DEVONSHIRE	243
Improving weed control by biotechnologically conferring herbicide resistance on crops - a progress report J. GRESSEL	245
Opportunities for improved control of plant parasitic nematodes via plant biotechnology H.J. ATKINSON	257
SESSION 6: RISKS AND REGULATIONS	267
Overcoming the onset of pest resistance with engineered crops D. BOULTER	269
Genetically modified organisms: the new rules on releases in the UK H. MARQUARD and D. STEELE	279
Regulations and controlling release of genetically manipulated organisms: North America N.N. RAGSDALE	285
Biotechnology - influencing public perception D.M. CONNING	299
Intellectual property for biotechnology T.W. ROBERTS	305
POSTERS:	321
Using plant secondary metabolites to engineer enhanced crop protection - progress with two contrasting approaches R. BENNETT, D. HALLAHAN and R. WALLSGROVE	323
Molecular genetic analysis of fungicide targets in the maize smut pathogen, <i>Ustilago maydis</i> J.P.R. KEON, A.M. BAILEY and J.A. HARGREAVES	325
Development of <i>Lacanobia oleracea</i> resistant transgenic tomato plants H.F. McARDLE and J.P. EDWARDS	327
Cloning of a housefly sodium channel gene linked to pyrethroid resistance M.S. WILLIAMSON, C.A. BELL, I. DENHOLM and A.L. DEVONSHIRE	329
Biochemical and molecular analysis of malathion resistance in <i>Culex tarsalis</i> and <i>Lucilia cuprina</i> V.K. WALKER, S. WHYARD, C. TITTIGER, R. RUSSELL and J. KAROTAM	331
The market for biopesticides S.G. LISANSKY	333
