

Set-aside

BCPC Monograph No. 50

Proceedings of a Symposium
organised by The British Crop Protection Council
held at Cambridge University
15th–18th September 1992

BCPC Registered Office
49 Downing Street
Farnham, Surrey GU9 7PH, UK

PREFACE	viii
SYMPOSIUM PROGRAMME COMMITTEE	ix
SESSION ORGANISERS & CHAIRMEN	ix
ACKNOWLEDGEMENTS	x
ABBREVIATIONS	xi
1. POLITICAL ASPECTS	1
Some lessons about the political-economic effects of set-aside: the United States' experience	
D.E. ERVIN	3
Political aspects of set-aside as a policy instrument in the European Community	
W.D. FLOYD	13
2. CROP AND SOIL RELATIONSHIPS	21
Changes in soil mineral nitrogen during set-aside and effect of rotational fallows on the yield and N-optima of subsequent cereal crops	
M.A. FROMENT and J.P. GRYLLES	23
Effect of set-aside on soil nitrogen and subsequent cropping	
A.H. SINCLAIR, E.B. STILL and S.B. HEATH	29
Changes in hydrology, pesticides and soil nitrogen levels under set-aside	
G.L. HARRIS, S.C. ROSE, A.D. MUSCUTT and D.J. MASON	35
Effect of set-aside on diseases of cereals	
D.J. YARHAM and B.V. SYMONDS	41
Posters	
A comparison of winter wheat yields from headlands with other positions in five fen peat fields	
C.S. SPELLER, R.A.E. CLEAL and S.R. RUNHAM	47
The effect of cultivation and plant establishment on nitrogen conservation on set-aside land	
M.V. HEWITT, C.P. WEBSTER and E.T.G. BACON	51
Effect of the cutting management of naturally regenerated set-aside land on the mineral nitrogen content in the soil profile	
E. FARR, A.H. SINCLAIR, K.M. LEE and D.A. ATKINSON	55
3. VEGETATION DEVELOPMENT UNDER SET-ASIDE	59
Monitoring of botanical composition of set-aside fields in England	
S.M.C. POULTON and A.R.H. SWASH	61
A botanical survey of set-aside land in Scotland	
N.M. FISHER, P.W. DYSON, J.M. WINHAM, D.H.K. DAVIES and K. LEE	67
The natural regeneration of vegetation under set-aside in southern England	
P.J. WILSON	73

Changes in vegetation composition and distribution within set-aside land L.J. REW, P.J. WILSON, R.J. FROUD-WILLIAMS and N.D. BOATMAN	79
Short-term effects of set-aside management on the soil seedbank of an arable field in south-east Scotland H.M. LAWSON, G. McN WRIGHT, D.H.K. DAVIES and N.M. FISHER	85
Significance of the seed rain from set-aside N.E. JONES and R.E.L. NAYLOR	91
Effect of rotational fallow on weed infestation M. LECHNER, K. HURLE and P. ZWERGER	97
Vegetation changes and weed levels in set-aside and subsequent crops J.H. CLARKE and F.B. COOPER	103
Factors affecting the plant cover developing on 5-year set-aside at Aldroughty Farm, Elgin M.A. FORD, K.M. LEE, D.A. ATKINSON and F. WILSON	111
The impacts of mowing and sowing on weed populations and species richness in field margin set-aside H. SMITH and D.W. MACDONALD	117
Changes in the species composition of a natural regeneration sward during the five-year set-aside scheme I.F. SHIELD, and R.J. GODWIN	123
Weed control implications of the return of set-aside land to arable production D.H.K. DAVIES, N.M. FISHER and D.A. ATKINSON	129
Posters	
Spatial and temporal variation in the vegetation in set-aside fields at Conington, Cambridgeshire I.D.S. BRODIE, C. GALLAGHER, G.L. HARRIS, T.J. PEPPER, <i>et al</i>	135
The influence of field boundaries on recolonisation of set-aside B.E. WRIGHT and R. BONSER	139
Effect of timing and frequency of cutting on perennial broad-leaved weeds M. AQUILINA	143
<i>Arrhenatherum elatius</i> – a potential problem under set-aside? J.W. CUSSANS, A.C.E. MILLER, A.J. MORTON and G.W. CUSSANS	147
4. FAUNA, INCLUDING INVERTEBRATES	151
Effect of set-aside on soil nematode fauna and vertebrates in eastern Scotland B. BOAG	153
Ground beetle communities on set-aside and adjacent habitats P.J. KENNEDY	159
Set-aside fallow or grassland: reservoirs of beneficial invertebrates? R. HOPPER and J. DOBERSKI	165
The effects of set-aside field margins on the distribution and biocontrol potential of polyphagous predatory arthropods in arable crops J.P. KIELTY, L.J. ALLEN-WILLIAMS and N. UNDERWOOD	169
The value of set-aside to birds J. SEARS	175

Invertebrate abundance on cereal fields and set-aside land: implications for wild gamebird chicks S.J. MOREBY and N.J. AEBISCHER	181
Brent geese: a conflict between conservation and agriculture J.A. VICKERY and W.J. SUTHERLAND	187
The effects of short and long-term set-aside on cereal pests M. HANCOCK, S. ELLIS, D.B. GREEN and J.N. OAKLEY	195
Posters	
The ecology of small mammals on set-aside agricultural land L.M. ROGERS	201
Statistical analysis of ground beetle data from a set-aside experiment E.A. HUNTER and R.G. MCKINLAY	203
5. ALTERNATIVE USES OF SET-ASIDE LAND	207
The potential for biomass production from crops on set-aside land C.S. SPELLER and J.J. HARVEY	209
Wood fuel production from short rotation coppice C. FOSTER	215
The use of set-aside land for game conservation N.W. SOTHERTON, N.D. BOATMAN and P.A. ROBERTSON	223
The Countryside Premium Scheme for set-aside land A.E. EWINS and R.J. ROBERTS	229
6. THE ECONOMIC AND SOCIAL EFFECTS OF SET-ASIDE	235
The economics of set-aside in England and Wales in theory and in practice D.J. ANSELL	237
Set-aside in France: how to use French regulation? Ph VIAUX and J.M. BODET	243
Institutional aspects of the land set-aside experience in Spain M. MERINO-PACHECO and J. BRIZ ESCRIBANO	249
Changes in land use pattern in Alentejo, Portugal under EC set-aside policy: implications for agricultural sector and region W. LORLEBERG	257
Set-aside and organic farming D.A. RAMSAY	263
The impact of the European Community' set-aside policy in Germany F. FASTERDING, R. PLANKL and A. JONES	269
'Should we set aside set-aside' A.E. BUCKWELL	275
