

**PROCEEDINGS OF THE  
BRITISH  
INSECTICIDE & FUNGICIDE  
CONFERENCE  
1961**

The Grand Hotel, Brighton  
Sussex, England  
NOVEMBER 6th, 7th, 8th & 9th, 1961

**VOLUME 1**

*Organised by  
Association of British Manufacturers of Agricultural Chemicals  
Cecil Chambers, 86 Strand, London W.C.2  
from whom the Proceedings may be  
obtained at 2gns. each.*

## PROGRAMME AND TABLE OF CONTENTS

|            |   |    |
|------------|---|----|
|            | Opening Address by the Conference President<br>Dr. H. G. Sanders, Ministry of Agriculture,<br>Fisheries and Food  | 13 |
| Session I: | SOIL PESTS AND DISEASES OF AGRICULTURAL<br>CROPS INCLUDING THEIR CONTROL BY SOIL<br>APPLIED CHEMICALS AND SEED DRESSINGS  |    |
|            | <u>Chairman:</u> D. W. Wright, National Vegetable Research<br>Station   |    |
|            | The Eelworm Problem. F. G. W. Jones, Rothamsted<br>Experimental Station   | 17 |
|            | <u>Research Report:</u>   |    |
| (A. 1)     | Field Experiments with a new organophosphorus<br>Nematicide against Potato Root Eelworm<br>W. D. Fraser, Field Station, Wisbech and<br>C. D. Lindley, Cyanamid of Great Britain, Ltd.   | 27 |
|            | Discussion  | 36 |
|            | Insecticides, Fungicides and the Soil<br>A review of a symposium held on 28th February, 1961,<br>to discuss the effects of chemicals on soil-inhabiting<br>organisms and other aspects of such treatments.<br>Hubert Martin   | 41 |
|            | Fungicide Seed Dressings<br>Mary J. M. Noble, Department of Agriculture and<br>Fisheries for Scotland   | 47 |
|            | Insecticidal Seed Dressings and Soil Insecticides<br>M. J. Way, Imperial College Field Station,<br>Ascot, Berks   | 53 |
|            | <u>Research Reports:</u>  |    |
| (A. 2)     | Results of Experiments with systemic insecticidal Seed<br>Dressings<br>R. Bardner, Rothamsted Experimental Station  | 61 |
| (A. 3)     | Studies of Effect on Germination of certain Solvents used<br>in experimental liquid insecticidal Seed Dressings<br>applied to Cereals which have received a standard<br>Application of a liquid organo-mercurial Compound<br>H. D. H. Womack, Shell Chemical Co. Ltd. | 67 |
|            | Discussion  | 75 |
|            |   | 5  |

Session II: SYSTEMIC INSECTICIDES INCLUDING THEIR USE  
FOR VIRUS CONTROL

Chairman: F C. Bawden, Rothamsted Experimental Station

Systemic Insecticides and Virus Control in Potatoes  
L. Broadbent, Glasshouse Crops Research Institute,  
and P. E. Burt, Rothamsted Experimental Station 81

Control of Sugar-beet Yellow  
R. Hull, Rothamsted Field Station, Dunholme, Lincoln 87

Research Reports:

- (B. 1) Comparisons of Aphicides, especially granular Systemics,  
for the Control of Beet Yellow  
R. A. Dunning and G. H. Winder, Rothamsted Field  
Station, Dunholme, Lincoln 93
- (B. 2) The Control of Sugar-beet Virus Yellow with Phorate  
Granules  
C. D. Lindley, Cyanamid of Great Britain Ltd. 107
- (B. 3) Field Trials with Thiodemeton for the Control of Aphids  
attacking Sugar-beet, Potatoes and Brassicas  
W. Linke, J. D. Forrest and B. G. Hoare,  
Baywood Chemicals Ltd. 117
- (B. 4) The Use of Dimethoate for the Control of Sugar-beet  
Virus Yellow in Great Britain  
Q. A. Geering, Chesterford Park Research Station 131
- (B. 5) A Progress Report on the Control of Aphids in Mangold  
Clamps by Methyl Bromide Fumigation  
R. A. Dunning, Rothamsted Experimental Station,  
A. B. P. Page, O. F. Lubatti and A. Mainwaring,  
Imperial College Field Station, Ascot, and C. Baker,  
Plant Pathology Laboratory, Harpenden 135
- Discussion 137

Session III: FORECASTING OF PEST AND DISEASE OUTBREAKS,  
SPRAY TIMINGS AND ECONOMICS OF CONTROL.  
POTATO BLIGHT AND ITS CONTROL.

Chairman: W. C. Moore, Ministry of Agriculture, Fisheries  
and Food

Some factors influencing the Control of Potato Blight  
G. H. Brenchley, National Agricultural Advisory  
Service, Eastern Region 139

Research Reports:

- (C.1) The chemical Control of Potato Blight in the U. K.  
E. Evans, Chesterford Park Research Station 145
- (C.2) Trials of Copper Fungicides: Adaptation of Bordeaux  
and Burgundy Mixtures for low volume Spraying  
A. V. Coombs, British Sulphate of Copper Association  
Ltd., H. S. Foster and H. L. Haigh, McKechnie  
Brothers Ltd., Widnes, Lancs 151
- Discussion 157
- (C.3) Pea Moth on dry harvesting Peas: Investigations into the  
timing of Sprays, the Economics of Control Measures  
and forecasting the Levels of Attack  
H. J. Gould and T. J. Legowski, National Agricultural  
Advisory Service, Cambridge 159

Session IV: CONTROL OF APPLE MILDEW

Chairman: R. W. Marsh, Long Ashton Research Station

The Control of Apple Mildew  
R. T. Burchill, East Malling Research Station 167

Research Reports:

- (D.1) (i) The Life History of Apple Mildew and the Field  
Assessment of the Disease 173
- (ii) Winter and Spring Pruning against Apple Mildew  
June V. Baker, National Agricultural Advisory  
Service, Cambridge 179
- (D.2) The Importance of short time Intervals between Sprays  
against Apple Powdery Mildew  
G. S. Roosje, Institute of Phytopathological  
Research, Wageningen 185
- (D.3) Spray Timing for Apple Mildew Control  
R. O. Sharples, Lenton Experimental Station 197
- (D.4) Some recent Observations on the Control of Apple Mildew  
D. Hunnam, The Murphy Chemical Co. Ltd. 205
- (D.5) The Control of secondary Infection of Apple Mildew by  
Dinocap and the Comparison of various Methods to  
assess Formulation Efficiency  
H. J. Terry, Horticultural Research Station,  
Ongar, Essex 213
- (D.6) The Effect of Apple Mildew on Yield and the Results of  
Spraying Trials for its Control  
J. Ingram, NAAS Experimental Horticulture  
Station, Luddington 227
- Discussion 233

Session V: PESTS OF TREE FRUITS: CONTROL OF RED  
SPIDER MITE, CODLING MOTH AND TORTRICIDS

Chairman: F. R. Tubbs, East Malling Research Station

Aspects of Biology of Importance in timing Sprays against  
Fruit Tree Red Spider Mite, Codling moth and the Fruit  
Tree Tortrix moths

G. H. L. Dicker, East Malling Research Station 239

Research Reports:

- (E. 1) The Control of Codling moth, Summer Fruit tortricids and  
Fruit Tree Red Spider mite, with special Reference to  
Azinphos-methyl  
(Miss) K. M. Powell, Baywood Chemicals Ltd. 247
- (E. 2) (i) Observations on the period and density of oviposition  
and apple entry by Codling moth in relation to timing  
of application of phosphamidon, ethion and DDT  
K. Carpenter and H. J. Terry, Horticultural  
Research Station, Ongar, Essex 255
- (ii) Leaf Bronzing in apples as a Measure of Efficiency of  
Acaricides and its relation to Leaf Population of Fruit  
Tree Red Spider mite  
K. Carpenter, Horticultural Research Station,  
Ongar, Essex 267
- (E. 3) The present Position regarding the Incidence and Control  
of Apple Aphids, Fruit Tree Red Spider mite, Fruitlet  
Mining Tortrix and Pear sucker  
J. H. Bryant and F. W. Webb, The Murphy Chemical  
Co. Ltd. 279
- (E. 4) Laboratory Techniques to determine, for advisory  
Purposes, the Susceptibility of the Fruit Tree Red  
Spider mite to Acaricides  
P. G. Clinch, Lenton Experimental Station 289
- (E. 5) Resistance of the Fruit Tree Red Spider Mite  
(*Metatetranychus ulmi*) to Acaricides and the  
Control of resistant Strains in the Netherlands  
M. van de Vrie, Institute for Phytopathological  
Research, Wageningen 297
- Discussion 301

Session VI: CONTROL OF BOTRYTIS DISEASES

Chairman: T. Swarbrick, Scottish Horticultural Research Institute

Introduction by the Chairman 305

The Biology and Control of Diseases caused by Botrytis spp.  
R. K. S. Wood, Imperial College of Science  
and Technology 309

Research Reports:

(F. 1) Problems in the Control of Raspberry and Strawberry  
Grey Mould  
W. R. Jarvis, Scottish Horticultural Research  
Institute 315

(F. 2) Observations on the Control of Botrytis in Anemones  
A. Elizabeth Jeff, Rosewarne Experimental  
Horticulture Station 321

(F. 3) The fungitoxic Effect of Dicloran on Botrytis cinerea  
R. O. Sharples, Lenton Experimental Station 327

Discussion 335

Session VII: CONTROL OF FUNGI AND NEMATODES BY SOIL  
STERILANTS

Chairman: L. Broadbent, Glasshouse Crops Research  
Institute

Experiments with Soil Sterilants, with special reference  
to Sodium N-methylthiocarbamate  
W. Madel, P. Schicke and G. Linden,  
CELA GmbH., Ingelheim/Rhein 337

Research Reports:

(G. 1) Investigations on nematocidal Activity and Crop  
Responses to chemical Soil Sterilants  
J. E. Peachey, Rothamsted Experimental Station 349

(G. 2) Six Years Experience with Metham-Na as a Soil  
Fumigant in the Netherlands  
L. P. Flipse, G. Ligtermoet and Zoon N. V.,  
Rotterdam 353

(G. 3) Some recent Investigations with chemical Soil Sterilants  
W. H. Read, J. T. Hughes and R. J. Smith,  
Glasshouse Crops Research Institute 361

(G. 4) Nabam, new Formulation and novel Uses  
D. Tyson, Pan Britannica Industries Ltd. 373

Discussion 391

EXTRA-SESSIONAL PAPERS ON ANALYSIS OF PESTICIDES

- (G. 5) The Analysis of Pesticide Residues in Foodstuffs:  
A Review of recent Developments in Analytical Methods  
H. Egan and E. Q. Laws, D. S. I. R., Laboratory  
of the Government Chemist 395
- (G 6) Analysis of synthetic organic Pesticides in Water by  
Chromatography  
E. Hinden and G. H. Dunstan, Washington State  
University 401
- Discussion 405

Session VIII: NEW DEVELOPMENTS, INCLUDING NEW  
COMPOUNDS, NOVEL FORMULATIONS, OR  
NEW APPLICATION METHODS

Chairman: J. T. Martin, Long Ashton Research Station

INSECTICIDE GROUP

- (H. 1) Systemic Migration and Insecticidal Activity of  
Dimethoate applied on Tree Trunks  
P. de Pietri-Tonelli, A. Barontini and  
G. Biondi, Soc. Montecatini 407
- (H. 2) Menazon: Development of a selective systemic Aphicide  
D. Price Jones Jealott's Hill Research Station 433
- (H. 3) Menazon: Control of Potato Aphids and aphid-transmitted  
Viruses by Tuber Treatment  
J. F. Newman, Jealott's Hill Research Station 441

FUNGICIDE GROUP

- (H. 4) Experiences with 5-Amino-3-phenyl-1-bis(dimethylamido)  
phosphoryl-1,2,4-triazole, a new Fungicide controlling  
Powdery Mildew  
H. Elings, Agrobiological Laboratory "Boekesteyn",  
's-Graveland, The Netherlands 451
- (H. 5) Triphenyl Tin Hydroxide, a Fungicide for the Control of  
Phytophthora infestans on potatoes, and some other  
fungus diseases  
A. J. Pieters, Agrobiological Laboratory "Boekesteyn"  
's-Graveland, The Netherlands 461
- (H. 6) Preliminary Results with a new compound for the Control  
of Apple Mildew and Red Spider in the U. K.  
P. G. Clinch, J. Collyer and D. J. Higgons,  
Lenton Experimental Station 471

Session IX: NEW DEVELOPMENTS, INCLUDING NEW  
COMPOUNDS, NOVEL FORMULATIONS, OR  
NEW APPLICATION METHODS (cont.)

Chairman: A. E. Muskett, Queen's University of Belfast

ACARICIDE GROUP

- (H. 7) Thioquinox - A new specific Acaricide of the Quinoxaline Group  
K. M. Powell and W. Linke, Baywood Chemicals Ltd. 489
- (H. 8) 2, 4, 5, 4'-Tetrachloro-diphenyl Sphide, an Acaricide with ovo-larvicidal Properties  
J. Meltzer and K. F. Jacobs, Agrobiological Laboratory "Boekesteyn", 's-Graveland, The Netherlands 499
- (H. 9) Investigations of a new Series of nitrogenous Organophosphorus Compounds, Characteristics and Properties  
Fausto Galbiati, Soc. Montecatini 507
- (H. 10) Investigation into the biological Activity of a Series of Butylene Polymers  
Ian Greenfield, F. W. Berk & Co. Ltd. 519
- (H. 11) Special Formulations for Low Volume Spraying  
G. S. Hartley and R. Howes, Chesterford Park Research Station 533
- Discussion 543

Session X: TRANSLATION OF RESEARCH INTO PRACTICE -  
THE INTRODUCTION OF INSECTICIDES AND  
FUNGICIDES INTO AGRICULTURAL PRACTICE  
AT HOME AND OVERSEAS

Chairman: E. E. Cheeseman, Agricultural Research Council

- Translation of Research into Practice - at Home  
M. Cohen, National Agricultural Advisory Service 547
- Translation of Research into Practice - Overseas  
George Ordish, Department of Technical Co-operation, Tropical Products Institute 555
- Discussion 561
