

# Predicting Field Performance in Crop Protection

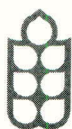

---

**Chaired by L G Copping**

---

Proceedings of a Symposium, organised by the  
SCI Crop Protection Group and the British Crop Protection Council

Held at the University of Kent, Canterbury  
10-12 September 2000

BRITISH  
CROP  
PROTECTION  
COUNCIL

<b>Preface.....</b>	<b>VIII</b>
<b>Symposium Organising Committee .....</b>	<b>IX</b>
<b>Abbreviations .....</b>	<b>X</b>

## Keynote Presentations

From genomics to agronomics - a road map for the next millennium D J Nevill.....	3
The evolution of the statistician: new trends for the 21 <sup>st</sup> century D J Pike .....	17

## Session 1

### Chemicals in Crop Protection

Volatility, vapour pressure and vapour activity G Briggs .....	29
Fungicide resistance risk management K M Chin and D W Hollomon .....	31
Insecticide resistance and its implications for the field performance of pesticides I Denholm, M D Barber, G J Devine, S P Foster <i>et al.</i> .....	37
Predicting pesticide and adjuvant field performance by physical/chemical characteristics and glasshouse studies A K Underwood, J M Thomas III and P M McMullan .....	47
Microencapsulation of Lambda-Cyhalothrin for crop protection – the Zeon technology E Y Sheu.....	57
Aspects of the variability in pesticide-soil interactions A Walker.....	65

## Session 2

### Biologicals in Crop Protection

Field performance of biopesticides H M T Hokkanen and I Menzler-Hokkanen.....	77
Biological control in Integrated Crop Management – success factors M Fidgett.....	87

Interpreting mycoinsecticide field performance: an uneasy relationship with chemical pesticide paradigms R P Bateman and B Luke .....	89
Controlling plant pathogens and improving plant growth and productivity with biologicals G E Harman .....	101
Implementing biological control technology into the management of alien invasive weeds: South African experiences and challenges T Olckers .....	111

### **Session 3**

#### **Field Experiences**

Factors affecting the impact of semiochemicals in insect pest-management: a simulation model of an attracticide strategy R P J Potting, P M Lösel and D Ebbinghaus .....	123
Optimising toxin presentation and acquisition processes F R Hall, T A Ebert and R A Downer .....	133

### **Session 4**

#### **Transgenic Organisms**

The current status of agronomic traits J S McLaren .....	145
Resistance to plant diseases J A Lucas and D W Hollomon .....	155
Transgenic baculoviruses L A King .....	163
The transfer of traits to wild relatives A J Gray .....	165
Transgenic approaches to modifying quality traits J M Dunwell .....	175
Testing foods derived through biotechnology for potential allergens R Townsend .....	185
Switchable transgenes A Greenland .....	193

#### **Poster Presentations**

Simulating field conditions in a glasshouse environment using 'soil box' technology: Part 1. The structure of the experimental unit S F Hanser, D A Palmer, M G Beccio and D P Dagarin .....	197
--	-----

Simulating field conditions in a glasshouse environment using 'soil box' technology: Part 2. Validation of methodology by evaluating soil applied corn rootworm insecticides S F Hanser, M G Beccio and J A Browde .....	203
Comparison of herbicide performance in climate simulator, semi-field and field experiments S K Mathiassen, P Kudsk and P K Jensen .....	209
Glasshouse-to-field transfer: a case study in tralkoxydim adjuvants R C Murfitt, A J Pierce, P B Sutton and J S White .....	215
Effective use of air for low drift of fine sprays G A Matthews and N H Thomas .....	221
Nozzle and chemical type effect on the dose response of barley powdery mildew J A S Barber, C S Parkin, P Miller and A B M N U Chowdhury .....	225
A new technologically unique adjuvant for use with fungicides and insecticides J M Thomas III and P M McMullan .....	231
