BCPC Diseases Review 2023

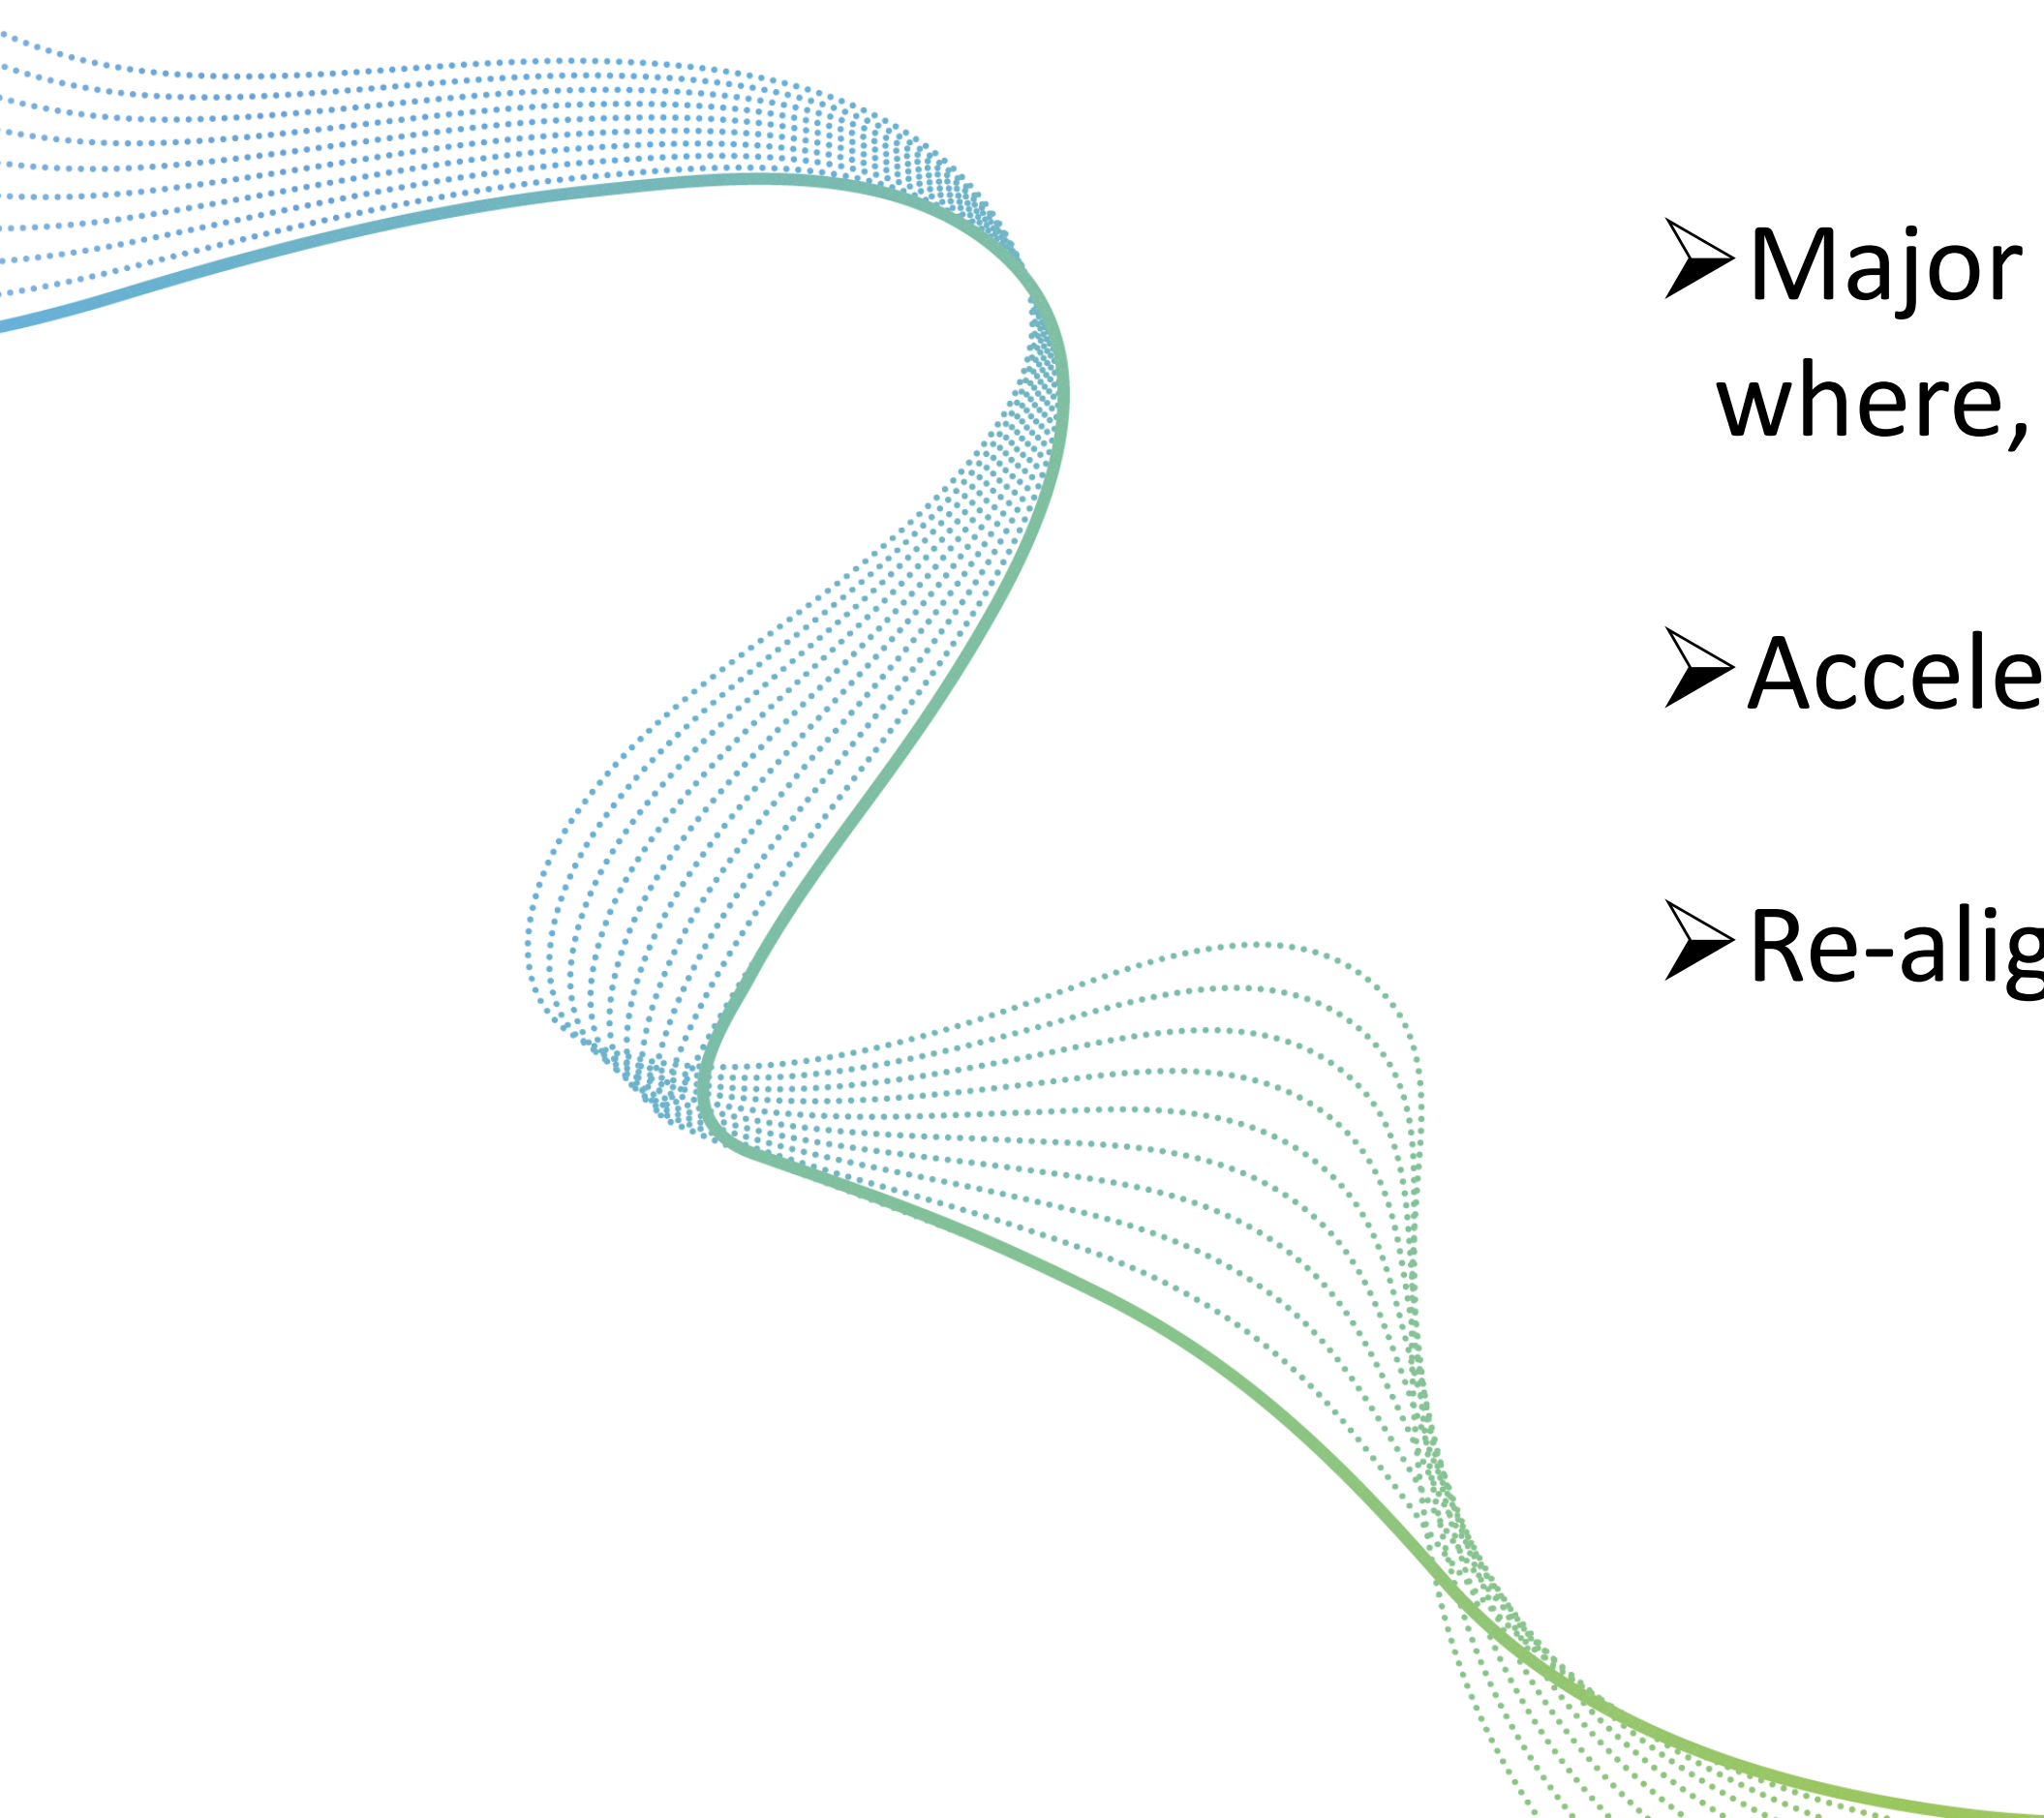

- Decrease GHG emissions
- Reduce inputs harmful to biodiversity, society & environment
- Bring no more land into production
- Threats to food production area due to climate change

➤ **Secure Global food supplies**

# What are the solutions – from a Plant Health perspective ?

- Major adjustment in how food is produced - where, what and how ?
- Accelerated innovation and implementation ?
- Re-alignment of plant health strategies ?
